SERVICES

For more infomation on cord length, water supply and electrical requirements, refer to the 'Services' section of this Planning Guide.

WATER

All Coffee Makers and Steam Ovens have internal water tanks which need to be filled manually. No external water supply is required.

DATA SHEETS

Model no:

Double Oven, 30" - OB30DDPTDX2

Product Dimensions

	in	mm
A Overall height of product	48 1/2	1232
B Overall width of product	29 15/16	760
C Depth of control panel (excludes handle, front stainless steel trim and dial)	1 9/16	40
D Depth of chassis and control panel (excludes handle, front stainless steel trim and dial)	24	609
E Depth of chassis	22 7/16	569
F Height of chassis	47 15/16	1218
G Width of chassis	28 3/8	720
H Height of control panel	3 15/16	100
I Height of stainless steel trim on control panel	3/4	20
J Height from bottom datum to top of upper oven door	44 1/16	1120
K Height from bottom datum to centerline upper of handle	43 1/8	1095
L Height from bottom datum to top of lower oven door	22	558
M Height from bottom datum to centerline of lower handle	21	533
N Height from bottom datum to bottom of lower door	11/8	29
O Height from bottom datum to bottom of upper door	22 7/16	570
P Width of handle	28 5/8	727
Q Depth of handle	1 5/8	42
R Thickness of handle	5/8	16
S Depth of lower door when open (measured from front of door)	20 7/8	530
T Depth of upper door when open (measured from front of door)	21 11/16	550

Minimum Clearances- Flush Installation

	in	mm
Minimum inside height of cavity	48 3/16	1224
Minimum inside width of cavity	28 1/2	724
Minimum inside depth of cavity*	24 3/16	615
Minimum clearance above oven control panel to upper cabinetry front panel or appliance	1/16	2
Minimum clearance between bottom of oven chassis to lower cabinetry front panel or appliance	1/16	2

*Measured from front of control panel
Note: Depending on cabinet panel thickness a rebate around control panel might be required.
IMPORTANT NOTE: For full installation and clearance details please refer to our installation manual.

PLANNING CONSIDERATIONS

DIVIDING SHELF

If the appliance front panel is thicker than the cabinetry front panel, adjust the dividing shelf depth to ensure the oven sits flush with the front of the cabinetry.

BLACK CLASHING

Black clashing is recommended on front facing edges where products are located and on side cabinets if cabinet is rebated.

OVEN CABINETRY TRIM

If using light-colored cabinets, we recommend using black cabinetry trim to help hide the cabinetry beneath the front door panel of the appliance. Ensure the trim height does not interfere with any appliances or cabinetry below. Black cabinetry trim is included with ovens.

LEVEL CABINETRY

Check the shelves are level and the side panels are straight.

Combination Steam Oven or Convection Speed Oven or Built-in Coffee Maker

Oven or Combination Steam Oven

Warming Drawer or Vacuum Seal Drawer

The models shown in this Planning Guide may not be available in all markets and are subject to change at any time. Product specifications may vary from those shown. This Planning Guide should not be used as installation guidance for any product. Further information is required to safely and correctly install the products featured here. Specific installation guidance will be available on our website fisherpaykel.com

Ventilation air vent is required at rear for some products.

Dividing shelves are required to support stacked appliances and to achieve correct clearance.

Dividing shelves must be constructed from material that will support the weight of the appliances.

Ensure the oven is not bearing any weight from cabinetry or products installed above.

Warming Drawers and Vacuum Seal Drawers can fully support a 30inch Fisher & Paykel oven, without adding a shelf in between.
