IMPORTANT! SAVE THESE INSTRUCTIONS

The models shown in this installation guide may not be available in all markets and are subject to change at any time. For current details about model and specification availability in your country, go to our website fisherpaykel.com or contact your local Fisher & Paykel dealer.

⚠ WARNING!

Electric Shock Hazard

Read and follow the safety and warnings outlined in this installation guide before operating this appliance.

Failure to do so can result in death, electric shock, fire or injury to persons.

⚠ WARNING!

Cut Hazard

Take care — panel edges are sharp. Failure to use caution could result in injury or cuts.

⚠ WARNING!

This appliance is top-heavy and must be secured to prevent the possibility of tipping forward.

To ensure that the appliance is stable under all loading conditions, the anti-tip bracket and fittings supplied must be installed according to the following installation steps by a professional installer.

IMPORTANT!

- It is very important for the installer to follow the instructions in this installation guide to ensure proper installation and operation of the appliance. Ensure that you read the installation guide thoroughly and understand all information.
- The water connection to your Ice and water appliance must be installed by a qualified plumber or Fisher & Paykel trained and supported service technician and comply with all state and local laws.
- Installation and use MUST comply with all state and local plumbing codes. Check with your local public works department for plumbing codes. You must follow their guidelines as you install the water filtration system.
- To avoid serious illness or death, only connect your water filter to safe drinking water.
- The water filter cartridge needs to be changed when the replacement indicator icon illuminates. This will happen every 6 months.
- If the water filtration system has been allowed to freeze, replace filter cartridge. Failure to replace the disposable filter at recommended intervals may lead to reduced filter performance and failure of the filter, causing property damage from water leakage or flooding.
- In cases of excessively reduced filter life — we recommend that you consult a local plumber or your water supplier for advice on suitable filtration requirements for the water supplied to your home.
- Filter replacement is the consumer's responsibility and will not be covered by the warranty except in the case of faulty parts or materials within the filter cartridge.
- If the water has not created ice for some time or ice has an unpleasant taste or odor dispose of ice and refer to the flushing instructions detailed in the installation section of this user guide/installation guide. If unpleasant taste or odor persists, you may wish to fit a new filter cartridge.
- Use new tubing supplied with the appliance. DO NOT reuse old tubing from old water and ice connections.
- Your water filtration system can withstand up to 120psi (827kPa) of water pressure. Ensure the supplied pressure reducing valve is installed before installing the water filtration system. DO NOT install if water pressure exceeds 120psi (827kPa).

To reduce the risk associated with property damage due to water leakage or flooding:

- DO NOT install systems in areas where ambient temperatures may go above 100°F (38°C) or drop below 33°F (0.6°C).
- DO NOT install on hot water supply lines. The maximum operating water temperature of this filter system is 100°F (38°C).
- DO NOT install where water hammer conditions may occur. If water hammer conditions exist, you must install a water hammer arrester.

WARNING!

To reduce the risk associated with choking:

- DO NOT allow children under 3 years of age to have access to small parts during the installation of the water filter.

2 COMPONENTS

Internal box (Installation kit)

Located inside appliance

A Anti-tip bracket assembly kit

Anti-tip bracket

2 COMPONENTS

Door panel set

Not supplied and must be purchased separately

Stainless steel (Fisher & Paykel) door panel set:

Includes 2x French door panels and 1x drawer panel.

Ice only door panel set
(RD36A72/RD32A72)

M5x14 mush cross-head (SS) screw
(34)

Ice and Water door panel set
(RD36A72U/RD32A72U)

M5x14 mush cross-head (SS) screw
(34)

Custom door panel set:

Supplied by customer to match their cabinetry.
Applicable for Ice only appliance models.

Door handle kit

Not supplied and must be purchased separately. Select between the options below:

Professional rounded
door handle (3x)

Professional square
door handle (3x)

Contemporary round
door handle (3x)

Contemporary square
door handle (3x)

Hex key
(1)

4 APPLIANCE AND CAVITY DIMENSIONS

IMPORTANT!

For ease of installation, ensure cavity width is consistent top to bottom and height is consistent left to right.

	RS32A		RS36A	
APPLIANCE DIMENSIONS	in	mm	in	mm
(A) Overall height of appliance*	71 7/8"	1825"	71 7/8"	1825**
(B) Overall width of appliance	31 1/8"	790	35 1/16"	890
(C) Overall depth of appliance (without door panels and hanging brackets)	23 11/16"	602	23 11/16"	602
(D) Overall depth of appliance (with hanging brackets only)	23 3/4"	604	23 3/4"	604
(E) Depth of toe kick (excluding front of door panel)	2"	50	2"	50

* Includes mounted rollers (20mm adjustment upwards)

	RS32A		RS36A	
CAVITY DIMENSIONS	in	mm	in	mm
(F) Overall height of cavity	72	1829	72	1829
(G) Overall width of cavity	32	813	36	914
(H) Overall depth of cavity	25	635	25	635
(I) Minimum cabinetry gap clearance from edge of appliance	3/16	4	3/16	4
(J) Minimum required finished return	min 3 1/2	min 89	min 3 1/2	min 89

⑤ CABINETY OPTIONS

FRAMELESS CABINETY (Aligns the appliance with the cabinetry)

FRAMED CABINETY (Aligns the appliance with the frame of the cabinetry)

Note: Drawings are only for reference and not the actual cavity width of the cabinetry.

6 DOOR PANEL DIMENSIONS

IMPORTANT!

- Custom door panels can only be used for non-Water dispensing models.
- Custom door panels to be manufactured and fitted by cabinetmaker.
- Door handle kit must be purchased separately.

ISO VIEW

STAINLESS STEEL/CUSTOM DOOR PANELS

DIMENSIONS		in	mm	in	mm
(A)	Height of each top door panel	44 3/16"	1123	44 3/16"	1123
(B)	Width of each top door panel	15 3/4"	400	17 3/4"	451
(C)	Gap between top door panels	3/16"	4	3/16"	4
(D)	Height of bottom drawer panel	23 7/16"	596	23 7/16"	596
(E)	Height from bottom of product to top of drawer panel	27 1/2"	698	27 1/2"	698
(F)	Width of bottom drawer panel	31 11/16"	805	35 11/16"	906
(G)	Gap between top door panels and bottom drawer panel	3/16"	4	3/16"	4
(H)	Depth of door and drawer panels (excluding handle)

9 DOOR CLEARANCE

Insert hinge limiting pin

WARNING!

- Before opening the doors, ensure that the appliance is stable.
- Follow these steps to avoid risks that can cause serious injury or death.

For 90° door swing, a hinge limiting pin is supplied with your appliance. This pin fits in the boreholes of the top hinge (B).

- ① Open door to 90°.
- ② Insert the hinge limiting pin vertically into the bore hole.
 - Apply a gentle tap to the pin if it does not slide smoothly.

DIMENSIONS	
Ⓐ	Depth of door (widest opening) measured from front of door
Ⓑ	Depth of drawer (open) measured from front of drawer, including handle
Ⓒ	Depth of drawer (open) measured from front of drawer, excluding handle
Ⓓ	Minimum door clearance* to adjacent wall (115° — full internal access)
Ⓔ	Minimum door clearance* to adjacent wall (90° — reduced internal access)

RS32A72		RS36A72	
in	mm	in	mm
15 9/16"	395	17 1/2"	445
15 3/4"	400	15 3/4"	400
14 3/16"	360	14 3/16"	360
11"	280	11 13/16"	300
3 15/16"	100	3 13/16"	100

* Measured from front cabinetry edge, includes 2mm cabinetry gap.

IMPORTANT!

- Electrical connection should be located in an adjacent cabinet to either side of the appliance or above the appliance cavity.
- We recommend to use an isolating switch that is easily accessible to the user after the appliance is installed.

WARNING!

- Electrical shock hazard. Assume all parts are live.
- Disconnect supply before servicing and installation.

ELECTRICAL AND PLUMBING CONNECTIONS

- ① Recommended location for connections in adjacent area or unit
- ② Alternative location for connections above the cavity
- ③ Alternative location for connections at rear of cavity

Electrical and water connections must be within this space if located behind the appliance and must not protrude from the back wall.

ELECTRICAL AND PLUMBING DIMENSIONS	RS32A72		RS36A72	
	in	mm	in	mm
Ⓐ Overall height of supply area	4 5/16"	110	4 5/16"	110
Ⓑ Overall width of supply area	2 15/16"	75	2 15/16"	75
Ⓒ Distance from left side of cavity	5 1/16"	129	5 1/16"	129
Ⓓ Distance from the floor	4 5/16"	110	4 5/16"	110

Note: Dimensions are based on minimum depth of cavity.

✗ Do not locate water or electricity in this area, keep clear of connections.

⚠ CAUTION: Central area can only fit water outlet and electrical plug if they are placed within a recessed cavity.

* In this location the water tap needs to be recessed into the wall, the recess must allow for an 80mm bend radius for the water tube.

Maximum distance of hose and power cord

Checking your appliance

- ① Detach accessories box taped to back panel of appliance.
- Refer to 'Components' (page 5).

IMPORTANT!
Be aware when removing the carton that the accessories box may have dislodged from the rear of the appliance during transit.

ELECTRICAL SPECIFICATIONS

Supply	115VAC, 60Hz
Service	10 amp circuit

PLUMBING SPECIFICATIONS

Supply	1/4" (6mm) comp. Stainless steel braided hose
Pressure	min. 22psi (150kPa) max. 120psi (827kPa) @ 68°F (20°C)

IMPORTANT!

- Be careful when unpacking to prevent damage to the surface of your appliance.
- Ensure that the appliance is stable to prevent from tipping over when unpacking.
- Do not open the doors to prevent the appliance from tipping over.
- The appliance is heavy and requires a minimum of 2 persons to unpack and install.

- Ensure that the feet of the appliance are retracted.
- If the appliance is damaged, contact your Fisher & Paykel dealer.
- Take note of your model and registration numbers located at the lower right side of the appliance. You will need these to request for servicing or repair of your appliance.

Checking your appliance

- 1 Detach accessories box taped to back panel of appliance.

Refer to 'Components' (page 5).

IMPORTANT!

Be aware when removing the carton that the accessories box may have dislodged from the rear of the appliance during transit.

- 2 Remove the water fittings and water filter kits, Installation kit, and Miscellaneous items pack from inside the appliance.

Refer to 'Components' (pages 4-5).

Water fittings and Water filter kits

Installation kit

Miscellaneous items pack

Moving your appliance

- 1 Remove the brackets from one side of the appliance. (For single door models, remove the brackets on the non-hinged side of the appliance.)

Note: Location of brackets depends on the model of your appliance.

- 2 Tilt the appliance slightly to the opposite side.

- 3 Insert the hand truck under the side of the appliance where the brackets were removed.

Do NOT insert the hand truck to the front or back of the appliance.

- 4 Restrain the appliance to the cart with straps.

- 5 Remove the brackets on the other side of the appliance.

- 6 Tilt the appliance backward onto the cart.

- 7 Set aside the pallet and push the cart to the installation location.

IMPORTANT!

- Your appliance is fitted with front and rear rollers designed for moving the appliance forward and backward. Do not move the appliance sideways as this may damage the rollers or the floor covering / surface.
- The appliance must be installed by a qualified installer, or Fisher & Paykel trained and supported service technician to avoid faulty electrical connection and water leaks.
- All connections for water, electrical power and grounding must comply with local codes and ordinances and be made by licensed personnel when required.
- Avoid installation of the appliance/s under a ground fault circuit interrupter (GFCI).
- Ensure the appliance is installed properly. Improper installation that results in appliance failure is not covered under the appliance warranty.

Check installation location

① Check the cabinetry

- Check the dimensions — height, width, depth, floor level, finished alcove returns.
- Ensure that the ventilation openings in the cabinetry are clear of obstruction.
- For integrated installation, a finished return of solid material is required across the top and sides of the new or existing alcove.
- Refer to the 'Appliance and cavity Dimensions' (page 7) prior to installation of the appliance.

② Check the power supply

- Ensure that there is a separate power outlet for the appliance.
- Avoid sharing the power point with other appliances to prevent the appliance from accidentally switching off.
- For power requirements, refer to the information on the serial plate. This is located at the front right-hand side of the drawer when open.
- Ensure your appliance is properly grounded (earthed).
- Connect the appliance to the electrical supply (115 VAC, 60 Hz) with fitted plug and lead.
- We recommend to use an isolating switch that is easily accessible to the user after the appliance is installed.
- Follow the National Electrical Code and all local codes and ordinances when installing this appliance.

③ Check the water supply (for Ice and Water models only)

- Ensure that there is a separate water supply connection for the appliance.
- Your appliance must be installed by a qualified appliance installer as incorrect plumbing can lead to water leaks.
- Fisher & Paykel is not liable for damage (including water damage) caused by faulty installation or plumbing.

Internal box

A Anti tip bracket kit

Anti-tip bracket
(1)

Masonry plug
(4)

#10x40 cross-head screw
(4)

Tools

Cross-head screwdriver

Powered driver (optional)

Pencil

IMPORTANT!

- The anti-tip bracket and fittings supplied must be fitted to the wall of the finished enclosure to withstand 220lbs (100kg) load.
- Ensure that anti-tip bracket is installed correctly to prevent the appliance tipping forward when door is open.
- Ensure the bracket is secured to structural beams or wall studs nearest to the center of the alcove.

Attach anti-tip bracket

- ① Project horizontally from the bottom edge of the finished enclosure towards the center of the back wall (A). This will locate the contact surface between the bracket and appliance.
- ② Mark the location for placement of the anti-tip bracket. Place the bracket so the top edge of the contact surface aligns with the mark (B).
- ③ Mark the locations of the screw holes on the wall based on the most central wall stud (C).
- ④ Drill screw holes to the marked locations.
- ⑤ **For wooden/plaster board wall installation:**
 - Fix the bracket to the wall with 10x40 pan head cross-head screws, and screw tightly (D).
- ⑥ **For solid wall installation:**
 - Hammer masonry plugs into the wall until flush.
 - Fix the bracket to the wall with 10x40 pan head cross-head screws (4x), and screw tightly (E).

WARNING!

Read the following before fastening with masonry plugs and/or screws:

- Ensure the screws avoid electrical, gas and water conduits.
- Ensure lightweight masonry material such as cinder block and new concrete (no curing time) are not used in installation.
- Do not use metallic materials that may corrode, stain and/or damage the enclosure.

IMPORTANT!

When positioning the appliance in the cabinetry, ensure that the anti-tip bracket overlaps the appliance by a minimum 2 3/8" (60mm) for a secure hold.

If the minimum 60mm overlap cannot be achieved, install a solid spacer to the wall stud behind the bracket.

IMPORTANT!

- The water connection instructions below are intended only for the professional installer.
- The appliance comes with a pre-connected plastic water tubing.
- Ensure the appliance is connected to its own isolating switch.
- Ensure there is enough tubing for the water connection and to pull the appliance out for service, if required.
- Flush water through the hose prior to connection to the appliance to remove any debris in the hose.

Connect to water supply (Ice and Water models only)

- 1 Move the appliance in front of the cabinetry close enough that you still have access behind for power and water connections (A).

1

Connect the water tap adaptor to a water tap. Flush water through the hose prior to connection to the appliance to remove any debris in the hose.

Internal box

Miscellaneous components

Power cord clip
(2)

Connect to power supply

- ① Locate the power cord and connect the fitted plug to the electrical supply (115 V, 60 Hz). Turn ON the appliance.
 - We recommend to use an isolating switch that can be accessed easily after the appliance is installed.

- ② Attach a power cord clip (A) to the back of your appliance.
- ③ Secure the excess power cord length onto the clip (B).

Alternative water and electrical connection (above the cavity)

- ① Connect the water fittings to the water supply (C).
- ② Plug-in the power cord to the electrical supply (D), and turn on the appliance.
- ③ Attach the power cord clip to the back of your appliance, and secure the excess power cord length onto the clip (E).
 - When pushing the appliance into position, take care not to roll over or damage the power cord and/or water tubing.

Refer to 'Electrical and Plumbing' for more information on recommended and alternative water and power connections.

Internal box

X Install fasteners kit

M5x10 cross-head screw
(10)

Tools

Cross-head screwdriver

Powered driver (optional)

WARNING!

- Be careful when working with the appliance outside of the finished enclosure.
- Ensure that the appliance is secured to prevent tipping forward. Tipping of appliance can lead to serious injury or death.

Remove hinge end caps

- ① Open the French doors carefully.

- ② Remove the left hinge end cap.

- Hold onto the corner of the end cap, firmly push to the right to disengage the securing hook and pull down (A).
- Pull cap gently towards the left hinge to remove (B).
- Keep the end hinge cap for later installation.

- ③ Remove the right hinge end cap.

- Press on the center of the cap and push towards the right hinge to remove (C).
- Keep the end hinge cap for later installation.

- ④ Loosely screw (1-2 turns) M5x10 cross-head screws into doors (D).

Repeat this process for all appliance doors.

Internal box

X Install fasteners kit

#12x12 Countersunk cross-head screw (2)

Tools

Cross-head screwdriver

Powered driver (optional)

Install the top trim

- ① Position the top trim on top of the top cover of the appliance (A).
- ② Align the small screw hole of the top trim with the screw hole of the hinge bracket (B).
 - Ensure the front face of the top trim is flush with the front face of the top cover (C).

Do this step to both right and left hinge brackets.

- ③ Fix the top trim by screwing #12x12 countersunk screws (D) through the screw holes of the top trim and hinge brackets.

IMPORTANT!

- Your appliance is fitted with front and rear rollers designed for moving the appliance in the forwards and backwards direction.
- Avoid moving the appliance in a sideways direction as this may damage the rollers or the floor covering/surface.
-
- Ensure the hose is not run over by the appliance when pushing into the cabinetry to prevent damage and possible water leaks.
- Ensure water tubing is routed away from any sharp objects, sharp corners (beware of kinking the tube as this will stop water flow), and not in a location where it can be kinked or squashed.

Position the appliance into the cabinetry

- ① Ensure the power cord are secured to the clip at the back of the appliance (A) and the excess water hose coiled flat behind the appliance.
- ② Push the appliance into the cabinetry until the anti-tip bracket overlaps the rear top edge of the appliance (B).
 - Ensure the appliance is centered.
 - Ensure there is firm contact between the appliance and anti-tip bracket with a min. 2 3/8" (60mm) overlap (C).

Refer to 'Attach anti-tip bracket' (page 19) for more information.

Supplied tools

Hex key

Tools

Ruler

Powered driver (optional)

Cross-head screwdriver

IMPORTANT!

- Ensure all four corners of the appliance is supported firmly onto the floor to eliminate any movement.
- **DO NOT** install the appliance on a soft, uneven, or unlevelled floor to avoid twisting the appliance and poor door sealing.
- We recommend to use A 4mm hex key.
- One turn of height adjusting nuts is equivalent to 1mm height adjustment.
Note: Maximum height adjustment is 13/16" (20mm).

- If using a powered driver, use low torque setting to avoid the nut disengaging from the rod and damaging the leveling system. If the nut disengages, use the hex key to realign with rod.
- Ensure that the top, bottom and side gap differences are not greater than 1.5mm to achieve correct alignment.
- Final alignment will be achieved once door panels have been installed and the appliance is pushed back to sit flush with the cabinetry.

Align appliance inside the cabinetry

- ① Centre the appliance within the alcove, using the adjacent walls as a guide.
- ② Raise the front of the appliance until the fixing brackets contact the ceiling of the enclosure (A).
 - Turn the front and rear adjusting nuts (B) clockwise to raise the roller or counter-clockwise to lower the roller.
- ③ To achieve correct alignment between front of the doors and adjacent cabinetry panels, turn the adjusting nuts alternately between front and rear rollers.
- ④ Check the gaps top and bottom, left and right by placing a ruler on the front of the appliance.
 - Ensure the gaps between appliance and adjacent cabinetry are even on both sides (C).
 - This step will help ensure the appliance is level with the adjacent cabinetry
- ⑤ Gently push the front of the appliance to check the stability

Internal box

B Door panel attachment kit

Side bracket (10)

Side strap (10)

Door handle kit

M5x25 pan head socket screw (12x)

Door panel set

M5x14 mushroom cross-head (SS) screw (34)

Tools

Hex key

FPA spanner

Cross-head screwdriver

IMPORTANT!

- Follow these steps to avoid difficulties in door panel adjustment and cosmetic cap fitment.
- Ensure to protect the finish of the Stainless steel door panels.
- For non-water dispensing door panels: Leave the protective film on the panels when hanging and remove the film only when installation is complete.

Remove hanging brackets

- ① Remove the M8 washers and M8 nuts from the M8 studs at the top of the door (**A**). Keep the washers and nuts to reuse later.
- ② Remove the hanging bracket from the top of each door and set aside (**B**) for later installation.

**Attach the door and drawer handles (A)**

- ③ Remove the plastic plugs from the handle holes (4 per each door panel).
- ④ Align the handle holes with the door panel holes and secure with M5x25 pan head socket screws (4 per each door panel).

Note: Door handle kit available and must be purchased separately. Refer to 'Components' (page 5) for more details.

**Attach the hanging brackets (B)**

- ⑤ Align the bracket to the holes and secure with M5x14 mushroom cross-head SS screws (14).

**Attach side brackets and straps (C)**

- ⑥ Align the brackets and straps to the holes on the side of the panel and secure with M5x14 mushroom cross-head SS screws (20).

Ice and Water display

(Ice and Water models only)

External display module
(1)**IMPORTANT!**

- Failure to follow these steps can lead to difficulties in door panel adjustment and cosmetic cap fitment.
- For water dispensing door panels: Remove the protective film from the appliance doors before hanging door panels.

**Connect the external display module
(for Water dispensing model only)**

- ① Locate the external display module from inside the appliance.
- ② Thread the display harness through the door panel cavity (A).
 - Ensure the grommet is engaged.
- ③ Turn the top display tabs at an angle into the door panel (B).
 - Ensure the harness is free of pinching.
- ④ Push firmly against the bottom display tabs and insert into the door panel until you feel it clip securely.
 - Ensure the display is flush with the door panel.

- ⑤ Remove water tube from the holder on the appliance door (C).
- ⑥ Hang the door panel onto M8 studs.
 - Ensure the panel is free to pivot for water connections.

- ⑦ Connect the display harness onto the appliance door by inserting firmly until you feel it clip securely (D).
 - On the external display, enable the dispenser lock to prevent any water from dispensing during water connection.
 - To lock, press the button for 4 seconds. The LED above the button will illuminate.

- ⑧ Enable the dispenser lock to prevent any water from dispensing during water connection. To lock, press the button for 4 seconds. The LED above the button will illuminate.
- ⑨ Push the water tube firmly into the spigot behind the door panel until the marked line is not visible (E).
 - Ensure the water tube is routed away from any sharp objects or corners, and not in a location where it can be kinked or squashed when the door panel is secured, (as this will stop water flow).

Tools

Cross-head screwdriver

Powered driver (optional)

Hex key

FPA spanner

Attach the door panels

- ① Open the door and loosen the M5x10 cross-head screws (do not remove) at the sides of the doors (A).
- ② Hang the door panel by inserting the M8 studs through the holes of the hanging bracket (B).
- ③ Slide the forks of the side brackets onto the screws of the door (C).
- ④ Screw the M8 washer and nut to each stud (D), and re-tighten the side screws (E) using the hex key and spanner to fix the door panel (do not fully tighten). This will allow opening the door without affecting adjustment of the door panel.

Powered driver (optional)

Ruler

IMPORTANT!

- Follow these steps to avoid difficulties in door panel adjustment and cosmetic cap fitment.

Adjust the door panels

- Push the appliance into the cavity until the door panels are flush with adjacent cabinetry surface.
- Place a ruler on the front of the appliance to check flushness top and bottom, left and right..

- Each door panel has full axis adjustment to ensure flushness with adjacent walls. To adjust the height of the panel, turn the stud clockwise to raise or counter-clockwise to lower the door panel (A).
- Once satisfied with the alignment, secure M8 studs with M8 washer and M8 nut (B). The top of the stud must remain below the top face of the door panel.

- Secure side bracket forks by tightening side screws (C).

Repeat for all door panels.

Note:

- For depth adjustment, loosen the side screws, adjust the panels and then retighten once satisfied.
- Further adjustment of door panels can be achieved by removing door panels then loosening the fixing screws for the hanging bracket and moving the bracket sideways to suit.

- Loosen the M8x16 crosshead screw (D) so that locking bracket can slide freely back to front.
 - Slide the locking bracket out until it touches the back of the door panel. Fully tighten the screw.
 - Screw in place using a #8x16 screw through one of the three slotted holes.

External box

Door panel template
(1)

Tools

Cross-head screwdriver

Powered driver (optional)

IMPORTANT!

- The template is a single sheet with one side used for the left door panel/drawer panel and the other side for the right door panel.
- The template should be placed on the back side of the door panel.

**Using the installation template
(for right French door panel)**

- 2** Mark drill locations of screw holes for the left hanging bracket and side brackets. Drill 3/32" (2mm) screw holes to the marked locations.

- 5** Mark drill locations of screw holes for the right hanging bracket and side brackets. Drill 3/32" (2mm) screw holes to the marked locations.

- 1A** Align left side edge of template with left side edge of top door panel.

- 4A** Align right side edge of template with right side edge of top door panel.

- 1B** Align bottom of template with bottom edge of top door panel.

- 3** Move the same template to right hand side of door panel.

- 4B** Align bottom of template with bottom edge of top door panel.

IMPORTANT!

- Flip the template over to use for the left top door panel.
- The template should be placed on the back side of the door panel.

**Using the installation template
(for left French door panel)**

- 2** Mark drill locations of screw holes for the left hanging bracket and side brackets. Drill 3-32 (2mm) screw holes to the marked locations.

- 5** Mark drill locations of screw holes for the right hanging bracket and side brackets. Drill 3-32 (2mm) screw holes to the marked locations.

- 1A** Align left side edge of template with left side edge of top door panel.

- 4A** Align right side edge of template with right side edge of top door panel.

- 1B** Align bottom of template with bottom edge of top door panel.

- 3** Move the same template to right hand side of door panel.

- 4B** Align bottom of template with bottom edge of top door panel.

- Use left door panel template to use for the drawer panel.
- Place the template at the back side of the drawer panel.

- 1A** Align top of template with top edge of drawer panel.
- 1B** Align left side edge of template with left side edge of drawer panel.

- 2** Mark drill locations of screw holes for the left hanging bracket and side brackets. Drill 3-32 (2mm) screw holes to the marked locations.

- 6** To mark the drill locations of middle screw holes, align the screw holes of the drawer hanging bracket with the right and left drilled screw holes. Drill screw holes to the marked locations.

- 3** Move the same template to right hand side of drawer panel.

- 4A** Align top of template with top edge of drawer panel.
- 4B** Align right side edge of template with right side edge of drawer panel.

- 5** Mark drill locations of screw holes for the left hanging bracket and side brackets. Drill 3-32 (2mm) screw holes to the marked locations.

Remove hanging brackets

- ① Remove the M8 washers and M8 nuts from the M8 studs at the top the door (A) using the hex key and spanner. Keep the washers and nuts to reuse later.
- ② Remove the hanging bracket from the top of each door and set aside (B) for later installation.

Attach the door and drawer handles (C)

- ③ Align the handle holes with the door panel holes and secure with M5x25 pan head socket screws (4 per each door panel).

Note: Door handle kit available and must be purchased separately. Refer to 'Components' (page 6) for more details.

Attach the hanging brackets (D)

- ④ Align the bracket to the holes and secure with #8x16 mush washer screws (14).

Attach side brackets and straps (E)

- ⑥ Align the brackets and straps to the holes on the side of the panel and secure with #8x16 mush washer screws (20).

Powered driver (optional)

IMPORTANT!

Lower the feet until it engages the floor to provide more stability to the appliance and prevent back and forth movement.

Secure the top trim to cabinetry

- ① Secure the top trim to the ceiling of the cabinetry with #8x16 flat head screws (**A**).
Repeat on the opposite side.
- ② Lower the feet until it engages the floor to provide more stability to the appliance and prevent back and forth movement.

Reattach the hinge end caps

- ③ Reattach the left hinge end cap (**B**).
 - Align hinge cap to the appliance, press and firmly slide the cap to the right.
 - Hold onto the corner of the end cap, firmly push up and to the left to engage securing hook. Ensure cap is flush with the appliance.
- ④ Reattach right hinge end cap (**C**).
 - Align hinge cap to appliance, press and firmly slide the cap to the left.
 - Ensure cap is flush with the appliance.

Miscellaneous items pack

Water filter
(1)

Filter cartridge tool
(1)

IMPORTANT!

- The water filter head must be firmly pushed into the appliance and secured. incorrect installation can lead to water leaks.

Install the water filter

- ① Remove the plastic wrapping of the new filter.
- ② Pull the freezer drawer out slightly and insert the filter into the casing at the bottom left corner of the appliance. Ensure the filter handle is positioned vertically (**A**).
- ③ Push the cartridge firmly inside the casing all the way into the filter head.

- ④ Align the filter removal tool over the filter handle and turn 90° clockwise to tighten (**B**). Remove filter removal tool and close the freezer drawer.

IMPORTANT!

- Before turning on your automatic ice maker, the water filter must be flushed to remove any impurities or trapped air in the water tank and filter system.
- Refer to the user guide 'Operating instructions — Automatic ice maker' for more information.

MI Pack

Toe kick filter
(1)

External box

Toe kick grille
(1)

Install the toe kick filter and grille

- ① Fit the filter onto the rails and push until it clips securely (**A**).
- ② Align the top grille clips to the top plinth slots. Ensure the top grille is in the correct orientation (**B**).
- ③ Push the grille firmly onto the appliance until the clips engage (**C**).

(4)

External box

Door side trim
(2)Drawer side trim
(2)Drawer top trim
(1)

Attach the covers

- ① Open the French doors. Attach the top covers (**A**) firmly over the top studs, and the side covers (**B**) to the side brackets.

Attach the door side trims

- ② Install the side trims by inserting into the panel gaps on each side of the door(s) (**C**). Align the trim to the top of the door and press evenly into the panel gap until fully seated (**D**).

Attach the drawer top and side trims

- ③ Peel off two dual adhesive tabs and press them together to form a pair (**E**). Remove the adhesive backing on one side only.
- ④ Press firmly to the underside of the drawer top trim in the indicated locations (**F**).

- ⑤ Remove the remaining adhesive backing from the dual adhesive tabs.
- ⑥ Locate the trim against the back surface of the panel and press down firmly. Ensure the trim is fully seated against the drawer surface (**G**).
- ⑦ Install the side trims by inserting into the panel gaps on each side of the door(s) (**H**).
 - Make sure the cabinet is centered to prevent the side trims from interfering with the cabinet.

TWO METHODS ARE AVAILABLE FOR ATTACHING CABINET SIDE TRIMS:

[A] FLEXIBLE SPRING CLIP METHOD — RECOMMENDED METHOD

[B] FIXED SCREW METHOD — METHOD TO USE IF CABINET IS NOT TO SPECIFICATION

(Attempt method [A]. If method [A] results in poor fitment of side trims due to cabinetry that is uneven or out of specification, use method [B]).

25 CABINET TRIMS INSTALLATION — [A] FLEXIBLE SPRING CLIP METHOD

(6)

Spring clip
(6)

External box

Cabinet side trim
(2)

- ① Break off the datum lip of each side trim bracket and discard.

- ② Place 3 side trim brackets onto each side trim.

Note: Measure from the top of the trim, with the short lip at the bottom (**A**).

IMPORTANT!

Each bracket has two engagement points for the side trim to locate.
Ensure the trim is engaged in both points (**B**).

Repeat for all side trims.

- ③ Insert the spring clip into the gap between the side trim and side trim bracket, orientation as shown in figures (C) and (D).

IMPORTANT!

Ensure spring clip is correctly oriented with the open loop facing the side trim lip.

Repeat for all side trims.

Top view of spring clip correctly inserted between side trim and side trim bracket

- ④ Open the French doors. Place the assembled side trim with brackets and spring clips against the alcove side wall with the shorter lip facing the bottom (E).

IMPORTANT!

Ensure the side trim is positioned as high as it will go.

Push the side trim at each bracket location until there are no visible gaps between the trim and cabinetry (F).

Repeat for all side trims.

(6)

#8x16 mush washer
screw (12)

External box

Cabinet side trim
(2)

- ① Break off the datum lip to each side trim bracket and discard.

Repeat for all side trim brackets.

- ② Position three side trim brackets on one side trim. Refer to (A) for bracket locations.
- ③ Open the French doors. Measure 2" (50mm) from the front of cabinet (from behind the doors), to the front of the alcove and accurately mark a vertical line (B).
- ④ Align the bracket edge with the marked line and fix the bracket to the cabinetry with #8x16 mush washer screws (C).

Repeat on the opposite side.

IMPORTANT!

Ensure correct positioning of bracket to prevent inaccurate fitting of side trim or gaps existing between side trim and appliance.

- ⑤ Place the side trim against the alcove side wall with the shorter lip facing the bottom (D).
 - Ensure the side trim is positioned as high as it will go.

Top view of side trim engaged correctly in side trim bracket

- ⑥ Engage the side trim with the brackets by pushing the trim inwards at the locations of the top and middle side trim brackets.
 ⑦ Once the trim has engaged with top and middle brackets, push and engage the side trim at the location of the bottom bracket (E).

Repeat for the remaining side trims.

IMPORTANT!

- Each bracket has two engagement points for the trim to locate. Ensure the trim is engaged at both points (F).
- Ensure there are no visual gaps between the appliance and side trims.
- Adjust the gaps by loosening the side trim screws and moving the trim within clearance. If further adjustment is required, relocate brackets to desired position.

**TO BE COMPLETED BY THE INSTALLER****All models**

- ☐ Ensure all internal and external packaging is removed from the appliance before use.
- ☐ Check all parts are installed.
- ☐ Ensure the appliance is level.
- ☐ Ensure the appliance is securely fastened to the cabinetry with the supplied anti-tip bracket and fittings.
- ☐ Ensure the doors/drawer can open and close freely with no resistance from surrounding cabinetry.
- ☐ Ensure hinge limiting pin is fitted for 90° door swing.
- ☐ Ensure the water filtration system has been flushed.
- ☐ Ensure a manual ice maker cycle has been forced.
