

## THE SHABBOS KEEPER FOR WATER HEATING

Manufactured by GE Appliances, the Shabbos Keeper is the most advanced Shabbos keeping device of its kind. With the entire Jewish calendar built inside, it will automatically set your water heater to Shabbos mode each week and every Yom Tov and also set it back to weekday mode after Shabbos based on your geographical location. It even handles combinations of Shabbos with differing holidays.

## THE ONLY 100% SHABBOS SOLUTION

The GE Appliances Electric Water Heater with FlexCAPACITY is designed to seamlessly integrate with the Shabbos Keeper. This innovative combination offers a variety of features, including automatic activation for Sabbath and Holidays, a built-in Jewish Calendar until 2050, and the ability to check hot water availability before the start of Shabbos, among many other features.

## TESTED & TRUSTED

Our product is endorsed by the highest rabbinical authorities in the U.S. and GE Appliances is a trusted partner of the Orthodox community.

After Shabbos, see how much hot water is available		•
During Yom Tov, the heater will reheat to halachic limit providing addition capacity.		•
Total Heating Element Control		•
FlexCAPACITY (outside of Sabbath/holiday)		•
Receive automatic alerts and notifications		•

## PEACE OF MIND

Enjoy unparalleled peace of mind with the only water heaters specifically engineered to work seamlessly with the Shabbos Keeper. There's no need to cover switches, adjust settings, or remember complicated procedures. Simply open the hot water tap anytime during Shabbat or Yom Tov—there's no risk of inadvertently activating the heating elements or cooking the water. The system ensures that heat is never applied during Shabbat, and during Yom Tov, heating occurs just once hourly to achieve a comfortable 104°F set point. If the water heater and Shabbos Keeper are not communicating, users will receive a notification. If temperature is not at the right degree user will be prompted.

## EASE OF USE

Experience true simplicity—once installed, these unique water heaters automatically handle all scheduling and settings. The unit automatically alerts users to prepare for Shabbos by using additional hot water if the temperature is above the halachic limit. Thirty minutes before sunset, the heater's setpoint is reduced to 104°F, ensuring it remains well below the halachic limit of 113°F. The display will show "SAb," confirming the unit is in Shabbos mode. Based on your geographical location, 72 minutes after sunset the following day, your preferred temperature setting is automatically restored.

## COMFORT

Relish the comfort of warm water for cleaning up after meals, even on the coldest winter Shabbat. With a setpoint of 104°F, these water heaters deliver water warm enough for washing hands on Shabbos or bathing on Yom Tov.

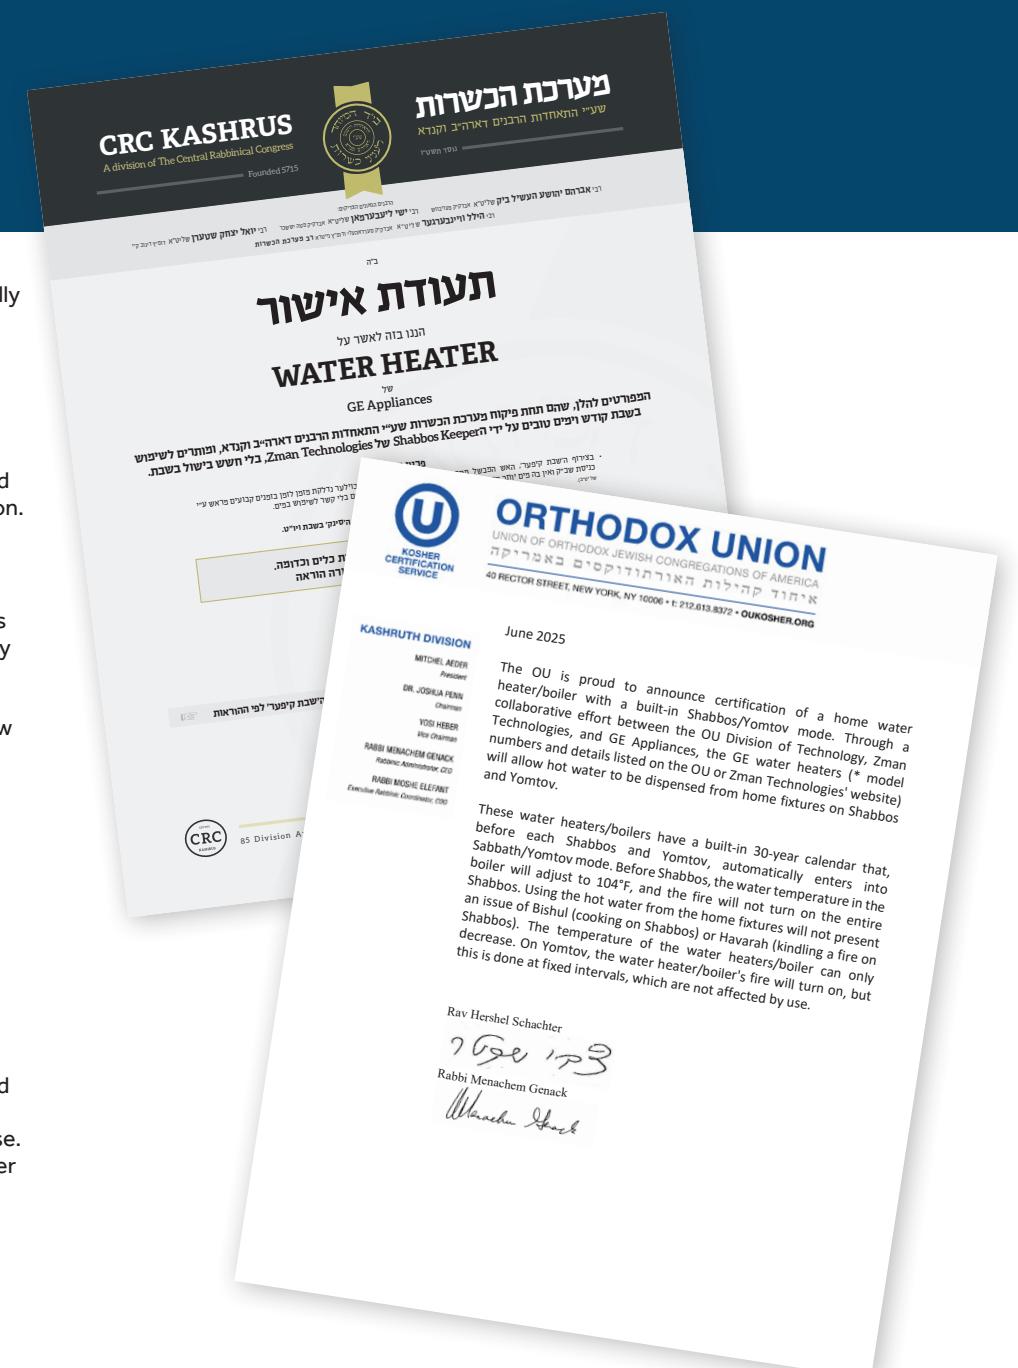

## CONVENIENCE

Paired with the Shabbos Keeper, the SmartHQ™ App offers unmatched convenience. Not only can you control the temperature of your water heater, but you can also monitor how much hot water is available for use. The app provides clear visibility for when hot water will be available after the observance, making planning effortless.

## ELECTRIC WATER HEATER WITH FLEXIBLE CAPACITY (INTEGRATED MIXING VALVE)

Select from three capacity settings: normal, high, and extra-high. When the high or extra-high settings is selected, water is stored at higher temperatures. As stored water leaves the tank, our integrated electronic mixing valve mixes in cold water to accurately produce the exact temperature required, making more usable hot water available. The result? Up to 60% more hot water\* when consumers need it. Allows a 50-gallon unit to act like an 80-gallon.

\*Versus comparable water heater without mixing valve at 120°F and 58°F inlet water temperature.

Letter of certification from the Union of Orthodox Jewish Congregations of America and the Central Rabbinical Congress of the U.S.A. and Canada.
