PLANNING CONSIDERATIONS

DIVIDING SHELF

If the appliance front panel is thicker than the cabinetry front panel, adjust the dividing shelf depth to ensure the oven sits flush with the front of the cabinetry.

BLACK CLASHING

Black clashing is recommended on front facing edges where products are located and on side cabinets if cabinet is rebated.

OVEN CABINETRY TRIM

If using light-colored cabinets, we recommend using black cabinetry trim to help hide the cabinetry beneath the front door panel of the appliance. Ensure the trim height does not interfere with any appliances or cabinetry below. Black cabinetry trim is included with ovens.

LEVEL CABINETRY

Check the shelves are level and the side panels are straight.

Combination Steam Oven or Convection Speed Oven or Built-in Coffee Maker

Oven or Combination Steam Oven

Warming Drawer or Vacuum Seal Drawer

The models shown in this Planning Guide may not be available in all markets and are subject to change at any time. Product specifications may vary from those shown. This Planning Guide should not be used as installation guidance for any product. Further information is required to safely and correctly install the products featured here. Specific installation guidance will be available on our website fisherpaykel.com

Ventilation air vent is required at rear for some products.

Dividing shelves are required to support stacked appliances and to achieve correct clearance.

Dividing shelves must be constructed from material that will support the weight of the appliances.

Ensure the oven is not bearing any weight from cabinetry or products installed above.

Warming Drawers and Vacuum Seal Drawers can fully support a 60cm Fisher & Paykel oven, without adding a shelf in between.
