FEATURES & BENEFITS

- Cooktop Power**
Sealed Dual Flow Burners™ deliver cooktop power up to 22,500 BTU for seriously fast boiling right down to a precise 140°F full surface simmer with the gentlest of flames.
- Cooking Flexibility**
The cooktop is designed for easy access to any burner with grates you can smoothly slide pots across. The oven is large enough to hold full size baking sheets.
- Design Quality**
This range has craftsmanship in every detail, with real stainless steel, cast-iron grates, and titanium coated dials. Each cavity features incandescent lights and full extension telescopic racks. From the robust legs to the powerful cooktop, the Range is built to last.

- Easy To Clean**
With a continuous, porcelain basepan, cleaning up spills is effortless. Your cooktop simply needs a quick wipe to keep it looking good as new.

- Total Control**
Precise control across high and low settings is delivered through the halo-illuminated cooktop dials.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
