MHN33 High-Efficiency Front-Load Washer

WHAT'S INSIDE MATTERS®

ADVANCED SPIN TECHNOLOGY

The MHN33's Advanced Spin Technology delivers more accurate cycle times and better unbalanced performance for a variety of load types*. The six-point suspension, accelerometer, progressive spin logic and pump routine combine to offer enhanced wash performance.

FEATURES:

FOUR DAMPERS

TWO SPRINGS

1 Six-Point Suspension

Provides better stability for entire wash unit with four dampers and two springs.

ACCELEROMETER

2 Accelerometer

Provides an accurate reading of cabinet vibration and allows washer to expand final spin speed limits.

PROGRESSIVE SPIN LOGIC

3 Progressive Spin Logic

Delivers consistent cycle performance by selecting the optimal final spin speed for each cycle and load type.

PUMP ROUTINE

4 Pump Routine

Helps reduce unbalanced loads through improved pump performance in final spin.

*Compared to previous model MHN30, based on an 18-lb load.
