SmartWater™

Get the quality water
you want for your home.

*Drinking water filtration ■ Water dispensers
Water softeners ■ Household filtration
Water heaters*

I want a healthy lifestyle.

Enjoy water that's better for drinking, cooking and cleaning.

Fresh, clean water is essential to health, as nearly 70% of your body is water. That's why good water is consistently ranked as one of the highest quality-of-life factors. So it's nice to know that improving your family's water is so easy with GE SmartWater™ filtration, softening and water heating systems.

These systems work together or separately to provide healthy, better-tasting water and a home that's cleaner, more efficient and more livable. That's why improving your water quality with GE SmartWater is one of the best things you can do for yourself, your family and your home.

With a GE SmartWater system, you will improve the quality of every drop of water in your home.

I want clean, better-tasting water for cooking and drinking.

GE SmartWater™ drinking water filtration lets you enjoy better-tasting water for a healthy lifestyle.

Now you can reduce the following from your family's drinking water:

- Chemical contaminants (VOCs) in the public water supply from pesticides, solvents, cleaners, gasoline and other sources
- Lead, mercury and other metals
- Cysts (parasites) that aren't covered under current EPA standards
- Bad taste and smells caused by chlorine
- Cloudiness and discoloration caused by sediment and rust

A healthy lifestyle

It's important to drink at least eight glasses of water every day. Filtering reduces many contaminants found in tap water.

Better-tasting water

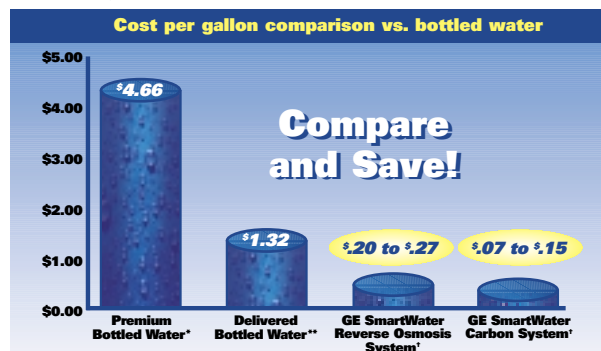

Filtered water tastes great, whether it's straight from the tap or blended in coffee, tea and juice.

Great for cooking

Cooking with filtered water provides great tasting foods.

Quality water at a fraction of the cost.

*National average price of "Premium" bottled water.

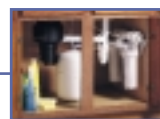

**National average cost per gallon for delivered bottled water.

†Estimate is calculated by dividing the system's rated gallons by the estimated consumer costs for the system, installation and replacement filters over the first year of use.

Choose the drinking water filtration that's right for you.

Reverse Osmosis— GE's Premium Filtration Process

10 gallons of filtered water per day for all your family's drinking and cooking needs.

GXRV10ABL

- Separate faucet included

GE's Best!

Reduces

Arsenic	Sodium	Tannins	Sediment
Chromium	Sulfate	Copper	Rust
Lead	Ammonia	Magnesium	And More!
Cysts	Nitrate/Nitrite	Chlorine:	Taste & Odor

Drinking Water Filtration

Dual-Stage Carbon Filtration

Better-tasting cooking and drinking water for families of three or more.

GXSV10C

- Six-month filter life
- Includes SmartWater™ faucet, filters, wrench, installation kit and Quick Connect fittings

GXSL03C (not shown)

Same as GXSV10C except:

- Reduces: Lead, Cysts, Asbestos, Chlorine: Taste & Odor, Sediment and Rust

Reduces

VOCs	Cysts	Chlorine: Taste & Odor
Lead	Asbestos	Sediment
Mercury	Turbidity	Rust

Single-Stage Carbon Filtration

Better-tasting cooking and drinking water for families of three or less.

GX1S15C

- Six-month filter life
- Includes SmartWater faucet, filter, universal wrench, installation kit and Quick Connect fittings

GX1S01C (not shown)

- Reduces: Chlorine: Taste & Odor, Sediment and Rust when used with FXUTC filter (sold separately)
- Faucet (UNFCTBL or UNFCTWW), filter and installation kit (SSKIT) sold separately

Reduces

Lead	Cysts	Chlorine: Taste & Odor
Mercury	Asbestos	Sediment
Atrazine	Turbidity	Rust
Lindane		

Faucet-Mount Filtration

Installs in minutes on most faucet types for better-tasting water from your tap.

GXFM03C

- Each filter treats up to 200 gallons of water or for three months
- Replacement filter included

Reduces

Lead	Atrazine	Chlorine: Taste & Odor
Cysts	Sediment	
Lindane	Rust	

Water Filtration Pitcher

Clean, better-tasting drinking water from a pitcher designed to fit in most refrigerator doors.

GXPL03D

- Uses Bacteriostatic filters
- Counter on lid shows when it's time to change the filter
- Filter included

Reduces

Lead	Copper	Rust
Mercury	Zinc	Sediment
	Chlorine: Taste & Odor	

See your local The Home Depot store for replacement filters.

I want better-tasting ice and water from my refrigerator.

GE SmartWater™ refrigerator and icemaker filters improve what goes into your glass.

Refrigerator/Icemaker Filter

Designed for refrigerators without a built-in water filter, these easy-to-install inline filters connect directly to the water lines behind your refrigerator.

GXRLO

- Filter life of 750 gallons or six months
- Easy to install—all parts included

*Change filters with one hand and stay dry with the **NEW** Twist and Lock System!*

Reduces

Lead	Atrazine	Turbidity
Cysts	Lindane	Sediment
Chlorine: Taste & Odor		

GXRTO

- Filter life of 2,000 gallons or six months
- Includes Quick Connect fittings

Reduces

Chlorine: Taste & Odor	Rust
Sediment	

I want convenience.

GE® bottled water dispensers give you a refreshing alternative.

Bottled Water Dispenser

Two separate faucets provide hot and chilled water instantly.

GXCF20E White

- Fits 3- and 5-gallon water bottles (not included)
- Large faucet pushbuttons are easy to use
- Child-resistant hot water faucet
- Convenient cool storage for beverages and snacks

GXCF05D Light gray (not shown)

Same as GXCF20E except:

- Nonrefrigerated storage compartment

Now you can be sure water is readily available anywhere in your home—the family room, the kids' rooms or the garage.

GXCC01D Light gray Countertop model

- Fits 3- and 5-gallon water bottles (not included)
- Large faucet pushbuttons are easy to use
- Child-resistant hot water faucet
- Stylish, compact design for countertop use

I want my appliances and plumbing to last longer.

GE SmartWater™ household filtration protects your biggest investment.

Household filtration:

- Filters water at the main water supply
- Reduces sediment, sand and rust that can damage plumbing and appliances
- Lets you enjoy better water throughout your home

With a household filtration system, you'll protect your home's water heater, plumbing and water-use appliances from the damage that can be caused by sediment.

Improve **ALL** your water

Household filtration systems improve all the water that enters your home. These systems are the perfect complement to water softeners and drinking water filtration systems.

Save on repairs

Can reduce sediment service issues on your appliances, water heater and plumbing fixtures.

Protect your plumbing

Reduces sediment and rust at your main water supply inlet.

Two things to remember:

- Determine the size of your pipes (usually 3/4" or 1")
- Decide where you'll install the system (preferably on the main water line)

GXWH30C

- Filters 4-20 gallons of water per minute
- Fits 3/4" or 1" pipes
- Filter and installation kit sold separately

Reduces

Chlorine: Taste & Odor	Soil	Sediment
Sand	Silt	Rust
(When used with FXHTC filter)		

GXWH08C

- Filters 4-12 gallons of water per minute
- Fits 3/4" pipes
- 2-position bypass valve allows for easy filter changes
- Filter (FXUSC) and installation kit included

Reduces

Sand	Sediment
Soil	Rust
Silt	

GXWH01C

- Filters 4-12 gallons of water per minute
- Fits 3/4" pipes
- Filter and installation kit sold separately

Reduces

Sand	Sediment
Soil	Rust
Silt	(When used with FXUSC filter)

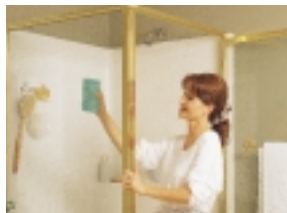

See your local The Home Depot store for replacement filters.

I want softer laundry and a bath that's easier to clean.

GE SmartWater™ water softening systems enhance the quality of your water from the kitchen to the bath.

High-efficiency GE SmartWater softeners include SmartSoft™ technology to “learn” your family’s water usage patterns, so you’ll always have soft water when you need it. This advanced engineering uses up to 60% less salt than conventional water softeners, while the low-wattage transformer uses up to 50% less energy than other 24V transformer-powered softeners to treat your water. A convenient bypass valve allows you to use non-softened water when you’re using water to wash cars or water lawns.

Easier to clean

Reduces hard water buildup, making tubs, showers and sinks easier to clean.

Whiter towels

Towels are 45% whiter while using 1/3 less detergent. Clothes are softer, cleaner, brighter and last longer.

Cleaner dishes

Gives you cleaner dishes by reducing soap and hard water spotting.

Feels softer and smoother

Soft water leaves your skin feeling noticeably softer and smoother.

Choose the water softener that's right for you.

Softening Systems with SmartSoft™ Technology

- Uses up to 60% less salt than conventional softeners
- Learns your water usage patterns to help ensure you have soft water when you need it
- Low-wattage transformer uses up to 50% less energy than other 24V transformer-powered softeners

We recommend installing your softening system at the point that water enters your home before the water heater.

Easy to use

Just enter the time of day, along with water hardness and the softener does the rest. Select models feature a status light to let you know whenever the softener needs attention.

GXSH39E

- 39,000 grains per regeneration cycle
- Advanced electronic water management system with status indicator light and “Days-to-Empty” indicator
- High-flow valve model—for homes with up to 1-1/4" plumbing

GXSF39E (not shown)

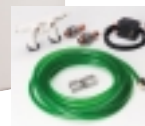

- 39,000 grains per regeneration cycle
- Deluxe electronic monitor with status indicator light and “Days-to-Empty” indicator
- For homes with up to 1" plumbing

GXSF27E (not shown)

- 27,000 grains per regeneration cycle
- Standard electronic monitor
- For homes with up to 1" plumbing

Installation Kit Included

A complete installation kit is included with product, plus bypass valve and drain tubing. A \$50.00 retail value.

I want plenty of hot water and low operating costs.

GE SmartWater™ water heaters keep your whole family comfortable.

A new GE SmartWater water heater can meet your family's demands for hot water in the bath or kitchen, while cutting your utility costs.

Whether you use electricity, gas or liquid propane (LP) gas, choose:

- Energy-efficient designs
- Large-capacity tanks
- Point-of-use models
- High-altitude models
- Compliance with California Title 24 and SCAQMD Rule 1121

Turn a smart purchase into a smart investment.

- Use a GE Smartwater Household filtration system to trap more than 85% of sediment particles, before they get into your heater
- Use a GE Smartwater Softener to minimize mineral scale buildup in your new water heater

Choose the water heater that's right for your home!
