Installation Diagram

⚠ WARNING Do not remove spacers (if equipped) on the side walls and/or on the back of the built-in oven. These spacers center the oven in the space provided. The oven must be centered to prevent excess heat buildup that may result in heat damage or fire.

NOTES:

- Allow at least 27 1/4" (69.2 cm) clearance in front of oven for door depth when it is open.
- Dimension **G** (cutout depth) is critical to the proper installation of the built-in oven. If the oven decorative trim does not butt against the cabinet, or if noise is heard on convection models, verify dimension **G** to assure it is the required depth.
- For a cutout height greater than 28 1/8" (71.4 cm) add one 2" (5 cm) wide wood shim of appropriate height to each side of the opening under the appliance side rails. For a cutout height (**H**) greater than 28 5/8" (72.7 cm) you can order a larger bottom trim, contact a Service Center
