A	1" (25cm)
B	27" (68.9cm) or 29" (73.7cm)
C	52 5/16" (132.9cm) or 54 1/4" (137.8cm)
D(+)	50 1/2" (128.3cm) or 52 3/4" (134cm)
E	29 3/4" (75.6cm) or 32" (82.1cm)

(+) 20" (50.8cm) additional needed for service

FLOORING

- To minimize noise and vibration, install the washer on a level, solidly constructed floor capable of supporting the washer without flexing or bouncing.
- The washer must be installed on firm flooring to minimize vibration during the spin cycle. Concrete flooring is best, but a wood floor is sufficient, provided it is built to FHA standards.
- The floor under the washer must not slope more than 1 inch (2.5 cm) from front to back or side to side.
- Installing on carpeting and soft tile surfaces is not recommended.
- Never install the washer on a platform or weakly supported structure.

FLOOR INSTALLATION

To ensure sufficient clearance for water inlet hoses, drain hose and airflow, allow minimum clearances of at least 1 inch (2.5 cm) at the sides and 4 inches (10 cm) behind the washer. Be sure to allow for wall, door, or floor moldings that may increase the required clearances
