⚠ WARNING!**Electric Shock Hazard**

Failure to follow this advice may result in electrical shock or death.

- Read and follow the safety and warnings outlined in this installation guide before operating this appliance.

⚠ WARNING!**Cut Hazard**

Failure to use caution could result in injury.

- Take care: panel edges may be sharp.
- Do not put fingers in the drawers when closing.

⚠ WARNING!**Tip Hazard**

- Do not operate this appliance until it has been securely anchored inside the cabinetry.

To ensure that the appliance is stable under all loading conditions:

- The appliance must be securely anchored to the floor by a professional installer according to the installation steps in this guide.

READ AND SAVE THIS GUIDE**WARNING!**

To avoid hazard, follow these instructions carefully before installing or using this appliance.

- Please make this information available to the persons installing the appliance.
- Assume all electrical parts are live.
- Disconnect power supply before servicing and installation.

BEFORE INSTALLATION

- The appliance must be installed by a qualified installer, or Fisher and Paykel trained and supported service technician to avoid faulty electrical connection.
- All connections for electrical power and grounding must comply with local codes and ordinances and be made by licensed personnel when required.
- Avoid installation of the appliance/s under a ground fault circuit interrupter (GFCI).
- Ensure the appliance is installed properly. Improper installation that results in appliance failure is not covered under the appliance warranty.

UNPACKING

- Remove all packaging materials supplied with the appliance.
- Avoid scratching the surface of your appliance when moving or installing.
- If the appliance is damaged, contact your Fisher and Paykel dealer.
- Ensure all components and accessories are complete.

ELECTRICAL/PLUMBING

- We recommend to locate the electrical connection of the appliance in an adjacent area or unit (cabinet or cupboard) that are easily accessible in case of repair or disconnection.
- Ensure the power outlet is located outside the cavity, within 72 13/16" (1850mm) from the CoolDrawer™ cavity if situated on the left-hand side of the cavity, and within 49 3/16" (1250mm) if situated on the right-hand side of the cavity.
- The services hole in the cavity needs to be large enough for the power supply plug to fit through.

INSTALLATION

- The installation bracket and fittings supplied must be fitted to the wall of the finished enclosure to withstand a 100kg load.
- Ensure that the installation bracket is installed correctly to prevent the possibility of the appliance tipping forward when the drawer is open.
- Ensure the power cord is not run over or damaged when installing the product into the cabinetry.
- For flush installation, ensure the drawer panel is installed flush with cabinetry front surface. Ensure the appliance is properly centered.
- Complete the final checklist after installation is complete.
- Protect the finish of the Fisher and Paykel Stainless Steel door panel from any scratch or damage.
- If using Custom door panels, ensure they are prepared as per 'Custom door panel install dimensions' section.
- The thickness of the custom door panel can vary as long as the screws do not penetrate beyond the full depth of the door panel, and as long as the overall weight of door panel does not exceed the allowable weight. Refer to 'Door panel dimensions' for maximum door panel weight of your product.

(N) Corner radius of internal shelf cutout	Ø 5/8	Ø 16

* Minimum internal height of cabinetry can be 644mm if vent duct is not used.

** If using internal shelf.

NOTE: The product can also be placed directly on the bottom shelf without the spacer or internal shelf depending on the height of your cabinetry.

ELECTRICAL CONNECTION

Services can be located on either side of the CoolDrawer™. Disconnect power to surrounding appliances before preparing the cavity.

SUPPLY DIMENSIONS	IN	MM
(A) Diameter of supply area cutout	Ø 2	Ø 50
(B) Distance from centre of supply area cutout to top of spacer	min 5 1/8	min 130
(C) Distance from front end of cabinetry frame to centre of supply area cutout	min 21 1/16	min 535
(D) Distance of supply area cutout to power outlet	min 33 7/16	max 850

ELECTRICAL SPECIFICATIONS	
Supply	115 VAC, 60 Hz
Service	10 amp circuit
Receptacle	3-prong grounding-type
Total length of power cord	78 3/4" (2000mm)
Power cord length exiting from left side of product	72 13/16" (1850mm)
Power cord length exiting from right side of product	49 3/16" (1250mm)

INSTALL BRACKETS

Locate the brackets to the top of each spacer.
Ensure there is 1" (25mm) clearance between the front end of cabinetry frame and front of bracket.

Secure each bracket to the spacer with countersunk screws (3x).

ATTACH VENT DUCTS

Locate the vent ducts to the slots in the cabinetry frame.

Cut each vent duct to be flush with the top of the spacer.

Smooth the sharp edges with a file or similar tool.

Secure the vent ducts by fixing with screws.

PANEL PREPARATION

STAINLESS STEEL PANEL

Locate the top attachment hooks (2x) in correct orientation to the screw holes at the back of drawer panel*, and secure with screws.

Tighten the locking screw of each hook to 3/16" (5mm) depth.

Locate one attachment hook in correct orientation to the screw hole at bottom middle of the back of drawer panel, and secure with screw.

Tighten the locking screw of the hook to 1/16" (1mm) depth.

Attach the handle* to the drawer panel.

Refer to the installation guide included in your purchased handle kit to attach the handle.

CUSTOM PANEL

Refer to the dimensions below for the preparation of the Custom door panel when attaching the attachment hooks. Drill the screw holes using a 6mm drill bit, and counterbore from the rear.

Refer to stainless steel panel instructions for securing the attachment hooks to the drawer panel. Refer to the installation guide included in your purchased handle kit to attach the handle.

*Illustrations showing Professional drawer panel and handle.

ATTACH POWER CORD & TRIM BRACKETS

1

Connect the power plug to the back of the Cooldrawer™ and clip the cord in place.

2

Secure the trim brackets with screws to the side of the Cooldrawer™ in the correct orientation.

POSITION PRODUCT INTO CABINETY

1

Place the Cooldrawer™ in front of the cabinetry and connect the power plug to the power outlet.

2

Slide the Cooldrawer™ into the cavity.
Do not screw in the trim brackets at this stage.

ATTACH DRAWER PANEL

Hook the drawer panel onto the drawer front channel.

Close the drawer and check vertical clearances.

Remove the panel and adjust the top attachment hooks as necessary.

Replace the panel on the drawer and confirm vertical clearances.

Slide the panel to achieve even horizontal clearances.

Open the drawer and clamp the panel onto the drawer by tightening the bottom attachment hook.

Close the drawer and ensure it is flush with the adjacent cabinetry. If not, the product may have to be pulled back or forward.

Ensure there is clearance between the panel and cabinetry when the drawer is fully closed.

SECURE PRODUCT TO CABINETRY

Open the drawer and secure the product to the cabinetry by securing the four trim brackets with screws.

ATTACH SIDE TRIMS TO CABINETRY

Install the side trims to the trim brackets in the correct orientation.

ATTACH FALSE PANEL

Attach the false panel securely as recommended by the cabinet maker. The false panel needs to be removable for servicing.

Check the top and side clearances. Ensure to check basic operation and complete the final checklist.

INSTALLER CHECKLIST

**Read all installation guidance in this document to see if the unit has been correctly installed.
Ensure that installation has been completed correctly before use.**

TO BE COMPLETED BY THE INSTALLER

Ensure that:

- | | |
|--|---|
| ☐ Has all packaging been removed from the appliance? | ☐ Is there clearance between drawer and cabinetry frame? |
| ☐ Is the appliance securely fastened to the cabinetry? | ☐ Has the power cord been plugged into a properly earthed 3-prong outlet, which has been installed in accordance with all applicable electrical codes? |
| ☐ Does the drawer slide freely and close properly? | ☐ Is the control panel lit? |
| ☐ Has the outlet duct been installed correctly? | ☐ Can you hear the compressor motor running? |
| ☐ Is the appliance level? | ☐ When a hand is placed near the toe kick, can airflow be felt under front right-hand side of appliance? |
| ☐ Are the panels securely attached? | ☐ Have you demonstrated the basic operation to the customer? |
| ☐ Have the panels been properly aligned for correct operation and appearance?
Are all clearances even? | |

Complete and keep for safe reference:
