GE Profile™ and GE® Built-In Cooking Products

The maximum in cooking performance and versatility.

imagination at work

It's all about great food.

With more convenience, **performance** and **style**, GE built-in products are changing the way the modern family cooks. And

Trivection™ technology is leading the charge. It has the ability

to produce optimal **food quality**, up to five times **faster**

than a traditional oven! The amazing **Precise Air™**

convection system uses an innovative fan that reverses

direction for optimal air and heat circulation. And when it

comes to style, we feature more **choices** to complement any

taste or preference. With self-clean models, **extra-large**

capacities and multi-dimensional features, GE offers

innovative built-in products designed for today's lifestyles.

Feature Gallery

Trivection™ technology
 Uses a combination of three heating methods: thermal, convection and microwave, to produce succulent foods up to five times faster than a conventional oven.

Speed baking mode/Speed broiling mode
 Automatically delivers the ideal combination of heating energy to produce optimal quality and browning, regardless of food type.

Precise Air™ convection system
 Uses an innovative fan that reverses direction for optimal air and heat circulation.

Multiple mode convection
 Offers three specialized modes for different cooking needs: **single-rack convection baking, multi-rack convection baking, and convection roasting.**

Extra-large 4.3 cu. ft. self-clean oven
 Provides a large oven interior for cooking more dishes and large meals at one time.

True Temp™ system
 Provides even heat distribution and maximum oven control.

7

Auto Recipe™ conversion

Automatically adjusts standard recipe time and temperature for speedcook modes.

8

Chef's Guide™ glass touch controls

Make oven programming quick and easy.

9

Big ClearView™ window

Provides a large, convenient area to check the progress of food.

10

Control lock capability

Prevents accidental oven activation.

11

Multiple cooking modes:

Features proof mode, warm mode, defrost mode and help mode delivering maximum versatility.

Certified Sabbath mode

Allows consumers to keep cooked foods warm on the Jewish Sabbath and Jewish holidays.

GE Profile Built-In Ovens featuring Trivection technology

It's all about great food! GE Profile wall ovens and slide-in ranges with exclusive Trivection technology achieve the delicate balance of heat and time by combining thermal, Precise Air convection and microwave heating methods. The result is mouth-watering foods up to five times faster than a traditional oven.

Thermal Heating

Traditional bake and broil elements provide dry heat from above and below the food, while helping maintain consistent oven temperature.

Precise Air Convection

An innovative fan reverses direction for optimal air and heat circulation, providing even cooking, faster roasting speeds and multi-rack baking capability. Ideal for accelerated browning.

Microwave Energy

Electromagnetic waves excite molecules in food and help accelerate the cooking process, ensuring faster cooking speeds.

Lasagna

A lasagna is usually large and dense with a high moisture content that benefits from high levels of all three energies. The thermal and convection energies will provide ideal browning, while the microwave will help to quickly bring the middle of the lasagna up to proper baking temperature.

A traditional oven cooks a lasagna in one hour using only thermal energy. A Trivection technology oven cooks a lasagna in 15 minutes using thermal, convection and microwave energies continuously throughout the cooking cycle.

Built-In Trivection™ Technology Cooking Products

JT980

GE Profile™ 30" Double Oven with Trivection Technology

- Trivection technology
- Speed baking/Speed broiling
- Precise Air™ convection system
- Convection Bake (multi-rack)
- Convection Roast
- Chef's Guide™ oven controls
- Extra-large self-clean oven

-  **JT980SHSS**
-  **JT980WHWW**
-  **JT980CHCC**
-  **JT980BHBB**

JT930

GE Profile 30" Single Oven with Trivection Technology

- Trivection technology
- Speed baking/Speed broiling
- Precise Air convection system

Model shown: JT955

Precise Air™ convection system

Uses an innovative fan that reverses direction for optimal air and heat circulation.

Auto Recipe™ conversion

Automatically adjusts standard recipe time and temperature for speedcook modes.

Eight-pass power bake

Provides total cooking coverage for consistent baking, and roasting.

Extra-large capacity

The largest capacity wall oven in America.* 30" wall ovens offer up to 4.4 cu. ft. capacity, while 27" models feature 3.9 cu. ft. capacity.

Heavy-duty oven racks

The durable construction of the heavy-duty racks provides additional support for large dishes.

Proof mode

Allows dough to rise efficiently and quickly by creating the perfect temperature conditions for yeast activation.

Feature Gallery

Precise Digital Control System™

Knobs are replaced with precise, one-touch pads that make controlling cooktop elements easy and convenient.

Dual heating element

Allows the choice of using a 6" or 9" element.

Bridge element (available on select models)

Combines two elements into one large surface for cooking flexibility.

Deep recessed cooktop

Helps contain spills for easy cleaning.

PowerBoil™ burner

This 15,000 BTU burner heats up fast with high power for skillets, woks or large pots.

Precise Simmer burner

Keeps delicate foods like sauces and gravies at a low setting.

Model shown: JS968

Precise Air™ convection system

Uses an innovative fan that reverses direction for optimal air and heat circulation.

Glass touch controls

The upfront, angled control panel makes an impressive statement and simplifies operation.

Bridge element

Connects the left front and rear elements to create an elongated cooking surface when recipes call for over-sized pans.

Model shown: JGS968

Two-speed convection fan

Circulates air throughout the oven ensuring better baking and roasting results.

Continuous grates

Allow for easy movement of pans between burners.

Dual-fuel

Model also available with electric convection oven.

30" Built-In Double Oven Dimensions (in inches) Model JT980

No change in cutout dimensions. Junction box may require relocation.

Cabinet	30"
A – Overlap of Oven Over Side Edges of Cutout	11-1/16" – 3/4"
B – Overlap of Oven at Top and Bottom of Cutout	1"
Oven	
C – Overall Depth	23-1/2"
D – Overall Height	52-7/8"
E – Overall Width	29-3/4"

MOST 30" WALL CABINETS CAN BE USED WITH THIS UNIT.
THE OPENING BETWEEN THE INSIDE WALLS MUST BE AT LEAST 28-1/2" WIDE.

(Must support 375 lbs.)

Electric wall ovens are not approved for installation with a plug and receptacle. They must be hard wired in accordance with installation instructions.

Installation Information: Before installing, consult installation instructions packed with product for current dimensional data or download from GEAppliances.com.

Note: Cabinets installed adjacent to wall ovens must have an adhesion spec of at least a 194° F temperature rating.

Note: If marks, blemishes or the cutout opening is visible above the installed oven, it may be necessary to add wood shims under the runners and front trim until the marks or openings are covered.

30" Slide-In Range Dimensions (in inches) Model JS998

Accessory Backguards (Shown above)
(Attaches to the back of range as a backguard when unit is installed in 30" free-standing cutout)
JXS37VW—White, JXS37CC—Bisque,
JXS37BB—Black/Stainless

30" Built-In Single Oven Dimensions (in inches) Model JT930

No change in cutout dimensions. Junction box may require relocation.

Allow minimum of 21" for clearance to adjacent corners, drawers, walls, or etc.

A=Allow 1" overlap of oven over top and bottom edges of cutout.
B=Allow 11-1/16"-3/4" for overlap of oven over side edges of cutout.

(Must support 275 lbs.)

Note: These ovens are *not* approved for stackable or side-by-side installations.

Most 30" Wall Cabinets can be used with this unit. The opening between the inside walls must be at least 28-1/2" wide.

Note: Cabinets installed adjacent to slide-in electric ranges must have an adhesion spec of at least a 194° F temperature rating.

Note: To reduce possibility of scorching the side walls above the countertop when no load is present on burners, it is recommended that a minimum 6" spacing from adjacent side wall be allowed for possible extended high-heat element operation.

Note: Door handle protrudes 2-3/4" from door face. Cabinets and drawers on adjacent 45° and 90° walls should be placed to avoid interference with the handle.

Receptacle Locations: For all 30" Slide-In Ranges locally approved flexible service cord or conduit must be used because terminals are not accessible after range installation. See shaded area in drawing for location of electrical outlet box. Recommended outlet locations allow range to be installed directly against rear wall.

Installation Information: Before installing, consult installation instructions packed with product for current dimensional data.

27"/24" Built-In Double Oven Dimensions (in inches)

Note: Cabinets installed adjacent to wall ovens must have an adhesion spec of at least a 194°F temperature rating.

Note: If marks, blemishes or the cutout opening is visible above the installed oven, it may be necessary to add wood shims under the runners and front trim until the marks or openings are covered.

Note: Door handle protrudes 2-3/4" from door face. Cabinets and drawers on adjacent 45° and 90° walls should be placed to avoid interference with the handle.

27" Built-In Microwave Double Oven Dimensions (in inches) Model JKP86

Note: Cabinets installed adjacent to wall ovens must have an adhesion spec of at least a 194°F temperature rating.

Note: If marks, blemishes or the cutout opening is visible above the installed oven, it may be necessary to add wood shims under the runners and front trim until the marks or openings are covered.

Note: Door handle protrudes 2-3/4" from door face. Cabinets and drawers on adjacent 45° and 90° walls should be placed to avoid interference with the handle.

Electric wall ovens are not approved for installation with a plug and receptacle. They must be hard wired in accordance with installation instructions.

Installation Information: Before installing, consult installation instructions packed with product for current dimensional data.

30" Built-In Single Oven Dimensions (in inches)

Single Oven Wall-Mount or Cabinet Installation (in inches)

Allow minimum of 21" for clearance to adjacent corners, drawers, walls, or etc.
A=Allow 1" overlap of oven over top and bottom edges of cutout.
B=Allow 11/16"-3/4" for overlap of oven over side edges of cutout.

(Must support 275 lbs.)

Most 30" wall cabinets can be used with this unit.

Note: These ovens are *not* approved for stackable or side-by-side installations.

Note: Cabinets installed adjacent to wall ovens must have an adhesion spec of at least a 194°F temperature rating.

Listed by
Underwriters
Laboratories

Optional Undercounter Installation With Gas Cooktop

Optional Undercounter Installation With Electric cooktop

Note: For this installation, the bottom trim **will not** be flush with a typical 4" toe kick.

Note: Cabinets installed adjacent to wall ovens must have an adhesion spec of at least a 194°F temperature rating.

Undercounter Installation (in inches)

Note: 36" ribbon cooktops (excluding JP960) are approved for use over GE 30" single wall ovens and warming drawers. 30" ribbon cooktops are approved for use over GE 30" and GE 27" single wall ovens and warming drawers. Refer to cooktop and wall oven installation information packed with products for current dimensional data.

Note: Door handle protrudes 2-3/4" from door face. Cabinets and drawers on adjacent 45° and 90° walls should be placed to avoid interference with the handle.

Installation Information: Before installing, consult installation instructions packed with product for current dimensional data and for alternate installation options.

Electric wall ovens are not approved for installation with a plug and receptacle. They must be hard wired in accordance with installation instructions.

Installation Information: Before installing, consult installation instructions packed with product for current dimensional data.

Undercounter Installation (in inches)

Note: When installing the warming drawer below a cooktop, a solid barrier must be installed at least 1" from the lowest point of the bottom of cooktop burner box to the top of the cutout. Use any solid material such as 1/4"-thick plywood. Allow at least 1/4" air gap between the barrier and the top of the warming drawer. See label on top of the warming drawer for approved cooktop models.

Installation Information: Before installing, consult installation instructions packed with product for current dimensional data.

Optional Accessory: Pan Set For Warming Drawer – JXPN2

Warming Drawer Dimensions (in inches)

Under Oven Installation (in inches)

Note: Additional clearance between cutouts may be required. Check to be sure that oven supports above the warming drawer location do not obstruct the required interior 23-1/2" depth and 9-1/4" height.

Note: Door handle protrudes 2-3/4" from door face. Cabinets and drawers on adjacent 45° and 90° walls should be placed to avoid interference with the handle.

Built-In CleanDesign Cooktops

Requires a 5" free area between the bottom of the cooktop to any combustible material, i.e., shelving. Free area not required when installing wall oven underneath cooktop. Refer to installation instructions. Units are furnished with a 48" flexible armored cable.

36" Ribbon Cooktops (excluding JP960) are approved for use over GE 30" Single Wall Ovens and Warming Drawers. 30" Ribbon Cooktops are approved for use over GE 30" and 27" Single Wall Ovens and Warming Drawers. Refer to cooktop and wall oven installation instructions packed with product for current dimensional data.

Notes: If installing with a GE Profile Telescopic Downdraft System, consult both cooktop and downdraft installation instructions packed with product before installing. Cooktop gas/electric supply may need to be re-routed to install downdraft.

The countertop must be at least 26" deep with a flat surface area of 23-1/2" or more, front to back. Stainless CleanDesign and Gas on glass cooktops require 23-5/8" flat surface area. In addition, other clearances to the front edge of the countertop must be considered.

Note: Consult cabinet and countertop manufacturer's specs for flush mount installation prior to install.

Filler Trim Kit

When replacing an old GE 30" cooktop (with larger opening) with Models JP939/931/930/350/340, use the following one-piece trim kit to fill in the over-size hole. Available at additional cost.

JXTR31W (True White)
JXTR31C (True Bisque)
JXTR31B (Black—use with black glass cooktops with a white, bisque or black pattern)

Flush Mount Installation Kit

Accommodates both 30" and 36" installations. Not for use with stainless steel models.

JXFLMTW (True White)
JXFLMCC (True Bisque)
JXFLMBB (Black—use with black glass cooktops with a white, bisque or black pattern)

Installation Information:

Before installing, consult installation instructions packed with product for current dimensional data.

Built-In Electric Cooktops

Required free area between the bottom of the cooktop and any combustible material, i.e., shelving is 5" minimum on models JP626/328 and 1-1/2" minimum on models JP201/202. Free area not required when installing wall oven underneath. Requires an 18" minimum from cooktop to adjacent overhead cabinets. Units are furnished with a 48" flexible armored cable.

Cooktop model JP328 is approved for use over select GE 27" or 30" Single Wall Ovens. JP626 is approved for use over GE 30" Single Wall Ovens only. Refer to cooktop and wall oven installation instructions packed with product for current dimensional data.

Cooktop models JP201CB and JP202D are approved for use over GE undersink dishwasher model GSM2100. Refer to cooktop installation instructions packed with product for current dimensional data.

Note: JP626 may be installed with a GE Profile Telescopic Downdraft System, consult both cooktop and downdraft installation instructions packed with product before installing. Cooktop gas/electric supply may need to be re-routed to install downdraft.

Note: The countertop must be at least 26" deep with a flat surface area of 23-1/2" or more, front to back. In addition, other clearances to the front edge of the countertop must be considered.

Filler Trim Kit—When replacing an old GE 30" cooktop (with larger opening) with Models JP328WF, JP328CF, JP328BF, JP328SF, use the following one-piece trim kits to fill in the over-size hole. Available at additional cost.
JXTR31W (White)
JXTR31C (Bisque)
JXTR31B (Black)

Installation Information:

Built-In Electric and Gas Downdraft Cooktops Dimensions (in inches)

Built-In Electric and Gas Cutout Dimensions (in inches)

*U.L. Requirement.

Note: A 5" minimum spacing to adjacent side wall is required on JGP989. A 6" minimum spacing to adjacent side wall is required on JP989.

Built-In Electric and Gas Cabinet Dimensions (in inches)

Receptacle Location

Install an approved junction box within shaded area shown in diagram. Junction box must be at least 10-1/2" below top of cabinet.

Preparing the Cabinet for Installation

In some cabinets, the sides may need to be scooped or cut down 5-3/4" as shown (right) and the corner braces removed in order to accommodate the cooktop.

Built-In Electric and Gas Downdraft Cooktops (continued)

Built-In Electric and Gas Downdraft Cooktop Venting Options

Built-In Electric and Gas Downward Venting (in inches)

Wall Installation

Wall installations require 25" countertop depth. When cabinet is flush against the wall, the fan housing can be rotated to the horizontal position for direct venting through rear wall. Make a countertop cutout in the range cabinet according to unit dimensions and installation type. Duct hole is positioned in back of cabinet for through-the-wall ducting. Requires special offset adapter JXRW89.

Peninsula or Island Installation

For peninsula/islands a minimum 26" countertop depth is suggested. Blower should be in vertical position. Island or peninsula cabinets may require adjustment in cutout depth and/or location within the width dimensions. Duct hole is positioned in bottom of cabinet for island or peninsula installation.

Slab Installation

For peninsula or island installation and rear wall ducting, **6" PVC duct or locally approved piping should be used if installing under a poured concrete slab.**

Note: Electrical cable is not supplied with unit.

JXRW89 Rear Wall Installation Kit

Optional accessories may be ordered for installation on rear wall.

JXCK89 Electrical Connection Kit

Optional accessory kit for JP989 electric downdraft cooktop only, includes junction box and conduit.

Installation Information: Before installing, consult installation instructions packed with product for current dimensional data.

Built-In Electric and Gas Rear Wall Venting (in inches)

Installing the Ductwork

Use galvanized or aluminum duct in 6" round or 3-1/4" x 10" size, or combination of both. **PVC duct or locally approved piping should be used if installing under a poured concrete slab.** Local building code must be followed in specifying type and schedule of all duct used.

Note: Ductwork must be vented to outside. Do not vent into a wall, ceiling, crawl space, attic or any concealed space. Always use an appropriate roof or wall cap with damper. **Laundry-type wall caps should never be used.** For maximum efficiency use the shortest and straightest duct run possible, with as few fittings as possible. For satisfactory performance the duct run should not exceed 100 feet equivalent length. Refer to the table of equivalent lengths (shown in installation instructions) for various duct configurations.

One 8" and one 6" plug-in heating element with one-piece bowls
JXDC43RBL—Black porcelain-enameled, JXDC44RWH—White porcelain-enameled

JXCK89 Electrical Connection Kit

Optional accessory kit for JP389 downdraft cooktop only, includes junction box and conduit.

Wall Installation

Wall installations require 25" countertop depth. When cabinet is flush against the wall, the fan housing can be rotated to the horizontal position for direct venting through rear wall. Make a countertop cutout that is centered in the range cabinet according to unit dimensions and installation type. Duct hole is positioned in back of cabinet for through-the-wall ducting.

Peninsula or Island Installation

For peninsula/islands a minimum 26" countertop depth is suggested. Blower should be in vertical position. Island or peninsula cabinets may require adjustment in cutout depth and/or location within the width dimensions. Duct hole is positioned in bottom of cabinet for island or peninsula installation.

Slab Installation

For peninsula or island installation and rear wall ducting, **PVC duct or locally approved piping should be used if installing under a poured concrete slab.**

Preparing the Cabinet for Installation

In some cabinets, the sides may need to be scooped or cut down 2" as shown and the corner braces removed in order to accommodate the cooktop.

Cutout Dimensions (in inches)

Note: These cooktops are U.L. approved for indoor use only.

*U.L. Requirement.

Note: A 6" minimum spacing to adjacent side wall is required

Installation Information: Before installing, consult installation instructions packed with product for current dimensional data.

Venting Options

Note: Ductwork must be vented to outside. Do not vent into a wall, ceiling, crawl space, attic or any concealed space. Always use an appropriate roof or wall cap with damper. **Laundry-type wall caps should never be used.** For maximum efficiency use the shortest and straightest duct run possible, with as few fittings as possible. For satisfactory performance the duct run should not exceed 100 feet equivalent length. Refer to the table of equivalent lengths (shown in Pub. No. 49-8552) for various duct configurations.

Downward Venting (in inches)

Rear Wall Venting (in inches)

Installing the Ductwork

Use minimum 26-gauge galvanized or 24-gauge aluminum duct in 6" round or 3-1/4" x 10" size, or combination of both. **PVC duct or locally approved piping should be used if installing under a poured concrete slab.**

*SS = Stainless steel with black accents, WW = White with white glass door, CC = Bisque with bisque glass door, BB = Black with black glass door, WH = White with black glass door, CT = Bisque with black glass door, CM = Color-Matched indicates color of drawer matches range cooktop (either white or bisque)

Note: Cabinets installed adjacent to slide-in electric ranges must have an adhesion spec of at least a 194°F temperature rating.

Note: To reduce possibility of scorching the side walls above the countertop when no load is present on burners, it is recommended that a minimum 6" spacing from adjacent side wall be allowed for possible extended high-heat element operation.

Note: Door handle protrudes 2-3/4" from door face. Cabinets and drawers on adjacent 45° and 90° walls should be placed to avoid interference with the handle.

Receptacle Locations: For all 30" Slide-In Ranges locally approved flexible service cord or conduit must be used because terminals are not accessible after range installation. See shaded area in drawing for location of electrical outlet box. Recommended outlet locations allow range to be installed directly against rear wall.

Installation Information: Before installing, consult installation instructions packed with product for current dimensional data.

All GE ranges are equipped with an Anti-Tip device. The installation of this device is an important, required step in the installation of the range.

Endcap Kit

JXS40—Endcap kit to accommodate replacement where countertop may already be notched.

Optional Gas Range Wok Accessory

(Available at additional cost)

JXWK = Wok accessory holder sits on top of burner grate to hold a round-bottom wok—JGSP23

JXWK2—J2S968, JGS968, JGSP48

Counter Cutout Dimensions (in inches)

Models J2S968, JGS968, JGSP48 and JGSP23

If you are NOT using the optional Filler or Backguard:

You must use the rear filler strip kit shipped with the range or the optional accessory backguard (JXS31, JXS34, JXS35, JXS37) when installing these ranges.

If you are using the optional Filler or Backguard:

Note: Cabinets installed adjacent to slide-in ranges must have an adhesion spec of at least a 194°F temperature rating.

Note: Door handle protrudes 2-3/4" from door face. Cabinets and drawers on adjacent 45° and 90° walls should be placed to avoid interference with the handle.

*JGSP23 and JGSS05 require 2" min. to nearest side wall.

All GE ranges are equipped with an Anti-Tip device. The installation of this device is an important, required step in the installation of the range.

*SS = Stainless steel, WW = White on white, CC = Bisque on bisque, BB = Black on black.

Note: Approved for use with GE Profile and GE® electric and sealed burner gas cooktops.

Blower Position

Note: Telescopic downdraft vents are not recommended to be installed with cooktops that are flush-mounted.

Approved for use with the following GE Profile and GE cooktops—36" and 30" electric models, 36" and 30" gas sealed burner models and 36" and 30" induction models.

Not approved for use with standard burner gas cooktops.

Note: The countertop must be at least 26" deep with a flat surface area of 23-1/2" or more, front to back. In addition, other clearances to the front edge of the countertop must be considered.

Note: Dimensions shown are for reference only. Before cutting out countertop, refer to instructions packed with **downdraft and cooktop**.

Note: Installation in cabinets/countertops against the wall will not be possible in most applications. Against the wall installations are limited to dimension requirements. Refer to installation instructions packed with product for further details.

JXBC67 Outdoor Cover. Optional accessory may be ordered for installation of motor and blower assembly on outside wall.

JXRB67 Indoor Remote Accessory. Optional accessory may be ordered for installation of motor and blower assembly in an indoor remote location.

Installation Information: Before installing, consult installation instructions packed with product for current dimensional data.

The hood is designed for a 3-1/4" x 10" duct size. A 3-1/4" x 10" rectangular to 6" round transition duct is available at your local building supply store.
