## Planning Information

The M Series Oven can be installed in a standard or flush inset application. If a cooktop is installed above an oven, a minimum of ¼" (6) is required between the units. The location of the electrical supply within the oven opening may require additional cabinet depth.

Finish the edges of the opening. They may be visible when the door is open.

For standard installations, the face trim will overlap stiles and rails. Refer to the chart below.

For flush inset installations, a minimum ⅛" (3) reveal is required on all sides. To ensure consistent reveals, each corner of the opening must be exactly 90°.

### INSTALLATION REQUIREMENTS

| BASE SUPPORT | MIN             |
|--------------|-----------------|
| Single Oven  | 250 lb (115 kg) |
| Double Oven  | 400 lb (181 kg) |
| TRIM OVERLAP |                 |
| Top          | 1" (25)         |
| Bottom       | 0" (0)          |
| Sides        | 1⅛" (18)        |

### DUAL INSTALLATION

Two M Series Single Ovens can be installed side by side in a standard or flush inset application. A dual installation kit is required. To maintain appropriate airflow, the ovens must be installed into one opening. Any cosmetic or structural material placed between the ovens will impede airflow and is not recommended. Refer to the illustrations on pages 14–15.

The dual installation kit is available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, [wolfappliance.com](http://wolfappliance.com).

### ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes. Locate the electrical supply flush with the back wall and within the shaded area shown in the illustrations on the following pages. For ease of installation, the electrical supply for the oven can be placed in an adjacent cabinet within reach of the conduit.

Performance may be compromised if the electrical supply is less than 240 volts.

The oven is supplied with a conduit consisting of two insulated hot lead conductors and a bare ground conductor. The wiring diagram covering the control circuit is provided with the oven.

### ELECTRICAL REQUIREMENTS—SINGLE OVEN

|                    |                              |
|--------------------|------------------------------|
| Electrical Supply  | grounded, 240/208 VAC, 60 Hz |
| Service            | 30 amp dedicated circuit     |
| Conduit            | 4' (1.2 m)                   |
| Total Amps         | 22                           |
| Max Connected Load | 5.4 kW                       |

### ELECTRICAL REQUIREMENTS—DOUBLE OVEN

|                    |                              |
|--------------------|------------------------------|
| Electrical Supply  | grounded, 240/208 VAC, 60 Hz |
| Service            | 50 amp dedicated circuit     |
| Conduit            | 5' (1.5 m)                   |
| Total Amps         | 45                           |
| Max Connected Load | 10.8 kW                      |

## Planning Information

The E Series Oven can be installed in a standard or flush inset application. If a cooktop is installed above an oven, a minimum of ¼" (6) is required between the units. The location of the electrical supply within the oven opening may require additional cabinet depth.

Finish the edges of the opening. They may be visible when the door is open.

For standard installations, the face trim overlaps stiles and rails. Refer to the chart below.

For flush inset installations, a minimum ⅛" (3) reveal is required on all sides. To ensure consistent reveals, each corner of the opening must be exactly 90°.

### INSTALLATION REQUIREMENTS

| BASE SUPPORT    |          | MIN             |
|-----------------|----------|-----------------|
| 24" Oven        |          | 150 lb (68 kg)  |
| 30" Single Oven |          | 250 lb (113 kg) |
| 30" Double Oven |          | 400 lb (181 kg) |
| TRIM OVERLAP    | 24" OVEN | 30" OVEN        |

| Bottom          | 0" (0)   | 0" (0)          |
| Sides           | 1⅛" (17) | 1⅛" (17)        |

### DUAL INSTALLATION

Two 30" E Series Single Ovens can be installed side by side in a standard or flush inset application. A dual installation kit is required. To maintain appropriate airflow, the ovens must be installed into one opening. Any cosmetic or structural material placed between the ovens will impede airflow and is not recommended. Refer to the illustrations on the following pages.

The dual installation kit is available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, [wolfappliance.com](http://wolfappliance.com).

Electrical Requirements

24" OVEN

Installation must comply with all applicable electrical codes. Locate the electrical supply as shown in the illustrations on the following pages. A separate circuit servicing only this appliance is required. A ground fault circuit interrupter (GFCI) is not recommended and may cause interruption of operation. Refer to the illustration below for minimum power cord plug clearance.

Performance may be compromised if the electrical supply is less than 240 volts.

ELECTRICAL REQUIREMENTS—24" OVEN

|                   |                              |
|-------------------|------------------------------|
| Electrical Supply | grounded, 240/208 VAC, 60 Hz |
| Service           | 20 amp dedicated circuit     |
| Receptacle        | NEMA 6-20R grounding-type    |
| Power Cord        | 6' (1.8 m)                   |

Power cord clearance

30" OVEN

Installation must comply with all applicable electrical codes. Locate the electrical supply flush with the back wall and within the shaded area shown in the illustrations on the following pages. For ease of installation, the electrical supply for the oven can be placed in an adjacent cabinet within reach of the conduit.

Performance may be compromised if the electrical supply is less than 240 volts.

The oven is supplied with a conduit consisting of two insulated hot lead conductors and a bare ground conductor. The wiring diagram covering the control circuit is provided with the oven.

Plumbing Requirements

PLUMBED MODELS ONLY

**IMPORTANT NOTE:** The unit needs minerals in the water to operate. Do not connect to a filtered water supply.

Installation must comply with all applicable plumbing codes.

**IMPORTANT NOTE:** The drain connection must be able to withstand temperatures up to 130°F (55°C).

The drain tube connection must be a minimum 2" (51) below the unit and a minimum 4" (102) from the floor. Locate the drain and water connections below the unit or in an adjacent cabinet. Any opening into the adjacent cabinet must meet the following: the longest dimension of the opening shall not be more than 1½" (38). The edges of the opening must be smooth and round.

**IMPORTANT NOTE:** The drain location can vary, but must be within reach of the corrugated tubing. Do not extend or reduce the drain tubing. A drain line high loop is required. Refer to the illustrations below.

Connect the water supply to a cold water house supply with an easily accessible shut-off valve between the supply and the unit.

PLUMBING REQUIREMENTS

|                  |  |
|------------------|--|
| Water Connection | 6.5' (2 m) braided tubing with 3/8" female compression fitting |
| Drain Connection | 10' (3 m) corrugated tubing                                    |

| 27" Trim   | NA            | 26 7/8" (683) |
| 30" Trim   | 29 7/8" (759) | 29 7/8" (759) |

Planning Information

DROP-DOWN DOOR MICROWAVE

The Drop-Down Door Microwave Oven can be installed in a standard or flush inset application.

Finish the edges of the opening. They may be visible when the door is open.

For standard installations, the face trim will overlap stiles and rails. Refer to the chart below.

For flush inset installations, a minimum 1/8" (3) reveal is required on all sides. To ensure consistent reveals, each corner of the opening must be exactly 90°.

INSTALLATION REQUIREMENTS

| BASE SUPPORT             |              | MIN            |
|--------------------------|--------------|----------------|
| Drop-Down Door Microwave |              | 125 lb (57 kg) |
| TRIM OVERLAP             | 24" MODEL    | 30" MODEL      |
| Top                      | 3/16" (5)    | 3/16" (5)      |
| Bottom                   | 0" (0)       | 0" (0)         |
| Sides                    | 1 1/16" (18) | 3 7/8" (98)    |

DRAWER MICROWAVE

The Drawer Microwave Oven can be installed in a standard or flush inset application. The location of the electrical supply within the oven opening may require additional cabinet depth.

Finish the edges of the opening. They may be visible when the drawer is open.

For standard installations, the face trim will overlap stiles and rails. Refer to the chart below.

For flush inset installations, a minimum 1/8" (3) reveal is required on the top and sides and 1 1/16" (18) on the bottom. To ensure consistent reveals, each corner of the opening must be exactly 90°. A sales accessory is required to direct air away from the unit. Accessories are available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, [wolfappliance.com](http://wolfappliance.com).

INSTALLATION REQUIREMENTS

| BASE SUPPORT         |           | MIN            |
|----------------------|-----------|----------------|
| 24" Drawer Microwave |           | 125 lb (57 kg) |

Planning Information

CONVECTION / STANDARD MICROWAVES

Convection and Standard Microwave Ovens can be installed in a standard or flush inset application using accessory trim to match Wolf ovens. Trim kits are available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, [wolfappliance.com](http://wolfappliance.com).

For standard installations, the face trim will overlap stiles and rails. Refer to the chart below.

Convection and Standard Microwave Ovens can also be used freestanding. For freestanding applications, a minimum 2" (51) space is required at the top, rear, and sides of the microwave oven for air circulation.

INSTALLATION REQUIREMENTS

| BASE SUPPORT                |              | MIN            |
|-----------------------------|--------------|----------------|
| Convection Microwave        |              | 125 lb (57 kg) |
| Standard Microwave          |              | 125 lb (57 kg) |
| 27" E SERIES TRIM OVERLAP   | CONVECTION   | STANDARD       |

| Bottom                      | 3/4" (19)    | 1 1/16" (17)   |
| Sides                       | 1 3/16" (21) | 1 3/16" (21)   |
| 30" M/E SERIES TRIM OVERLAP | CONVECTION   | STANDARD       |
| Top                         | 1/4" (6)     | 9/16" (14)     |
| Bottom                      | 3/4" (19)    | 1 1/16" (17)   |
| Sides                       | 1 3/16" (30) | 1 3/16" (30)   |

Electrical Requirements

Installation must comply with all applicable electrical codes.

Locate the electrical supply as shown in the illustrations on the following pages. The receptacle may also be located in an adjacent cabinet within reach of the power cord. A separate circuit servicing only this appliance is required. A ground fault circuit interrupter (GFCI) is not recommended and may cause interruption of operation. Refer to the illustration below for minimum power cord plug clearance.

ELECTRICAL REQUIREMENTS

|                   |                          |
|-------------------|--------------------------|
| Electrical Supply | grounded, 120 VAC, 60 Hz |
| Service           | 15 amp dedicated circuit |
| Receptacle        | 3-prong grounding-type   |
| Power Cord        | 4' (1.2 m)               |

CUSTOM PANEL

Warming Drawers

DRAWER FRONT OPTIONS

Wolf Warming Drawer fronts allow for many design options, but the warming drawer itself will be the same for all applications. A panel mounting kit is required when installing a custom panel. The panel mounting kit is available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, [wolfappliance.com](http://wolfappliance.com).

The 2" (51) thick drawer front, in 30" and 36" widths, is designed to be installed below a Wolf Sealed Burner Rangetop or Outdoor Grill, so the panel aligns properly with the front of the rangetop or grill. Dimensions for the warming drawer remain the same, even though the drawer front may be wider to match the Sealed Burner Rangetop or Outdoor Grill.

DIMENSIONS

STAINLESS STEEL DRAWER FRONT

| WIDTH            | W             |
|------------------|---------------|
| 30" Drawer Front | 29 7/8" (759) |
| 36" Drawer Front | 35 7/8" (911) |

| M/E SERIES           | A           | B            |
|----------------------|-------------|--------------|
| Stainless            | 7/8" (22)   | 3 1/4" (83)  |
| Black                | 1" (25)     | 3 3/8" (86)  |
| Stainless (2" thick) | 2 1/8" (54) | 4 1/2" (114) |

INTEGRATED DRAWER FRONT

| CUSTOM PANEL         | W             | H             | D         |
|----------------------|---------------|---------------|-----------|
| Dimensions (typical) | 29 7/8" (759) | 10 3/8" (264) | 3/4" (19) |
| Min Thickness        |               |               | 5/8" (16) |

Planning Information

The Warming Drawer must be installed with a Wolf drawer front, available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, [wolfappliance.com](http://wolfappliance.com). Specific installation instructions are included with the drawer front.

The Warming Drawer can be installed in a standard or flush inset application.

For a standard installation, the drawer collar and front panel sit proud of the cabinet face frame. A recessed installation requires the cabinetry be recessed by 3/16" (5) so the collar is flush with the cabinet face frame but the drawer front will sit proud. A flush inset installation requires the drawer collar and front panel be recessed to be flush with surrounding cabinetry. Refer to illustrations on the following pages for minimum cabinet dimensions for your specific installation.

Finish the edges of the opening. They may be visible when the drawer is open.

For standard installations, the face trim will overlap stiles and rails. Refer to the chart below.

For flush inset installations, a minimum 1/8" (3) reveal is required on all sides. To ensure consistent reveals, each corner of the opening must be exactly 90°.

INSTALLATION REQUIREMENTS

|                                   |                |
|-----------------------------------|----------------|
| Min Base Support                  | 200 lb (90 kg) |
| Trim Overlap (top, bottom, sides) | 5/8" (16)      |

Planning Information

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes.

Locate the electrical supply flush with the back wall and within the shaded area shown in the illustrations on the following pages. For ease of installation, the electrical supply for the warming drawer can be placed in an adjacent cabinet within reach of the power cord.

**IMPORTANT NOTE:** When installed outdoors, a ground fault circuit interrupter (GFCI) is required to reduce the risk of electrical shock.

ELECTRICAL REQUIREMENTS

|                   |                          |
|-------------------|--------------------------|
| Electrical Supply | grounded, 120 VAC, 60 Hz |
| Service           | 15 amp dedicated circuit |
| Receptacle        | 3-prong grounding-type   |
| Power Cord        | 3' (.9 m)                |

Warming Drawer

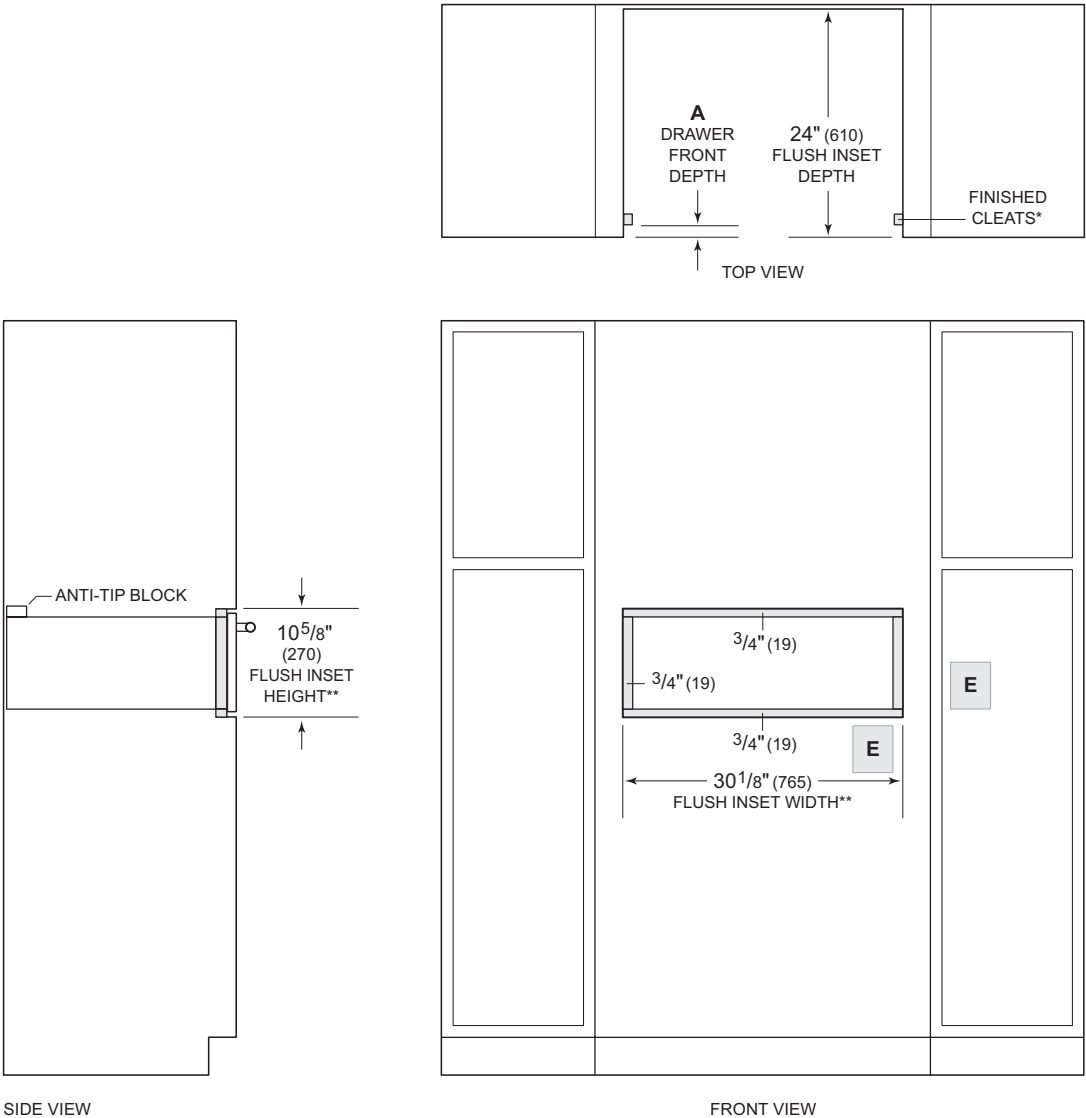

STANDARD INSTALLATION

NOTE: Location of electrical supply within opening may require additional cabinet depth.

Warming Drawer

FLUSH INSET INSTALLATION

\*Will be visible and should be finished to match cabinetry.  
\*\*Dimension provides minimum reveals.  
NOTE: Location of electrical supply within opening may require additional cabinet depth.

| M/E SERIES DRAWER FRONT DEPTH | A           |
|-------------------------------|-------------|
| Stainless                     | 1 1/8" (29) |
| Black                         | 1 3/8" (35) |
| Stainless (2" thick)          | 2 1/8" (54) |

Custom front panel depth is dependent on panel thickness. Add 1/4" (6) to the panel thickness to determine the drawer front depth.

Planning Information

A minimum 2" (51) is required from the bottom of the cooktop to combustible materials.

Clearance is required for the conduit located at the right rear of the cooktop. Refer to the illustrations on the previous pages for dimensions for Induction and Electric Cooktops. Refer to the illustrations on the following pages for additional minimum clearances.

FLUSH INSTALLATION

Contemporary Induction and Electric Cooktops can be mounted flush with the top of the countertop or as a frameless standard installation sitting on top of the countertop surface. If the cooktop is to be mounted flush with the countertop, a recessed area surrounding the cooktop cutout must be provided.

**IMPORTANT NOTE:** Flush mount installations are intended for granite, solid surface, or stone countertop surfaces only.

MULTIPLE COOKTOPS

When multiple cooktops or modules are installed side by side, the countertop cutout width is determined by adding the width of each unit, then subtracting 1" (25). Refer to the illustration below.

**IMPORTANT NOTE:** Contemporary Induction and Electric Cooktops are not designed to be installed in combination with other cooktops.

Countertop cutout

Electrical Requirements

Installation must comply with all applicable electrical codes.

Refer to the illustrations on the following pages for location of the electrical supply for Induction and Electric Cooktops. A separate circuit servicing only this appliance is required. A ground fault circuit interrupter (GFCI) is not recommended and may cause interruption of operation.

When multiple cooktops are installed side by side, each unit must have its own separate recommended electrical circuit.

## Planning Information

A minimum 2" (51) is required from the bottom of the cooktop to combustible materials. If the cooktop is installed above an oven, a minimum of 1/4" (6) is required between the units.

The Contemporary Gas Cooktop can be mounted flush with the top of the countertop, or as a standard installation sitting on top of the countertop surface. If the cooktop is to be mounted flush with the countertop, a recessed area surrounding the cooktop cutout must be provided. The countertop must be able to withstand temperatures up to 300°F (149°C).

Control knobs for the Contemporary Gas Cooktop are designed to be mounted on the front face of cabinetry below the unit. Mounting holes must be drilled through the cabinet face. Refer to the illustrations on pages 76–77 for the hole location.

## ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes. Locate the electrical supply as shown in the illustrations on the following pages. A separate circuit servicing only this appliance is required. A ground fault circuit interrupter (GFCI) is not recommended and may cause interruption of operation.

### ELECTRICAL REQUIREMENTS

|                   |                          |
|-------------------|--------------------------|
| Electrical Supply | grounded, 120 VAC, 60 Hz |
| Service           | 15 amp dedicated circuit |
| Receptacle        | 3-prong grounding-type   |
| Power Cord        | 6' (1.8 m)               |

## GAS SUPPLY

Installation must comply with all applicable gas codes. If local codes permit, a certified, 3' (.9 m) long, 1/2" (13) or 3/4" (19) ID flexible metal appliance connector is recommended.

Wolf natural gas cooktops will function up to 10,250' (3124 m) in altitude without adjustment and LP gas cooktops will function up to 8,600' (2621 m). If the installation exceeds these elevations, contact an authorized Wolf dealer for a high altitude conversion kit.

Planning Information

**IMPORTANT NOTE:** Wolf does not recommend the use of downdraft ventilation with the Steamer, Fryer, or Grill Modules.

A minimum 2" (51) is required from the bottom of the module to combustible materials. For the Teppanyaki Module, a minimum 7/8" (22) is required from the bottom of the unit to any material.

Refer to the illustrations on the following pages for installation of Module Cooktops.

MULTIPLE COOKTOPS

When multiple cooktops or modules are installed side by side, refer to the chart and illustration below for typical configurations. The cutout dimensions provided will accommodate the use of an optional filler strip if desired.

For specific multiple cooktop and module configuration options or the installation of more than six modules, contact Wolf Customer Care at 800-222-7820.

Countertop cutout

Planning Information

ELECTRICAL

Installation must comply with all applicable electrical codes.

Locate the electrical supply as shown in the illustrations on the following pages. A separate circuit servicing only this appliance is required.

When multiple cooktops or modules are installed side by side, each must have its own separate electrical supply.

ELECTRICAL REQUIREMENTS

ELECTRIC MODULES

|                                   |  |
|-----------------------------------|--|
| Electrical Supply                 | grounded 3-wire, 240/208 VAC, 50/60 Hz |
| Steamer, Fryer, Grill, Teppanyaki | 15 amp dedicated circuit               |
| Induction                         | 20 amp dedicated circuit               |
| Conduit                           | flexible 4' (1.2 m)                    |

GAS MODULES

|                   |                             |
|-------------------|-----------------------------|
| Electrical Supply | grounded, 120 VAC, 50/60 Hz |
| Service           | 15 amp dedicated circuit    |
| Receptacle        | 3-prong grounding-type      |
| Power Cord        | 6' (1.8 m)                  |

DRAIN OUTLET

Steamer and Fryer Modules require a method for draining hot water and oil. For the Steamer Module, options include connecting a drain hose from the 5/8" (16) outlet tied into an existing drain, a separate drain with freefall, or placing a heat-resistant receptacle under the drain outlet. For the Fryer Module, the drain outlet must be accessible to drain oil into a heat-resistant receptacle.

Planning Information

GAS SUPPLY

Installation must comply with all applicable gas codes.

If local codes permit, a certified, 3' (.9 m) long, 1/2" (13) or 3/4" (19) ID flexible metal appliance connector is recommended.

When multiple gas cooktops or modules are installed side by side, they can receive their gas supply from a common line. However, each unit must have its own regulator installed between the mainline and the cooktop or module.

Wolf natural gas cooktops will function up to 10,250' (3124 m) in altitude without adjustment and LP gas cooktops will function up to 8,600' (2621 m). If the installation exceeds these elevations, contact an authorized Wolf dealer for a high altitude conversion kit.

GAS REQUIREMENTS

|                        |                                 |

|           |                        |
|-----------|------------------------|
| 24" Model | $23\frac{1}{2}"$ (597) |
| 30" Model | $29\frac{7}{8}"$ (759) |

Planning Information

The Coffee System can be installed in a standard or flush inset application. The sides of the cabinet opening must be adequate to support installation of the mounting slides. Refer to the illustration below.

Finish the edges of the opening.

For standard installations, the face trim overlaps stiles and rails. Refer to the chart below.

For flush inset installations, a minimum 1/8" (3) reveal is required on all sides. Each corner of the opening must be exactly 90° to maintain consistent reveals.

COMBINATION INSTALLATIONS

If a Coffee System is installed above a Cup Warming Drawer, specify one opening for both units. To achieve the minimum reveal between the units, place the Coffee System support rails on top of the Cup Warming Drawer, then secure the rails to the sides of the cabinet. Any material between the units will increase the horizontal reveal between the two products.

Planning Information

**IMPORTANT NOTE:** When installing against a combustible surface, a minimum 10" (254) riser is required for a 36" dual fuel range with charbroiler or griddle and all 48" and 60" models. Follow all minimum clearances to combustible surfaces shown in the illustration on the following page.

A Wolf Pro Ventilation Hood is recommended with the Dual Fuel Range. Refer to page 148 for Pro Ventilation.

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes.

Locate the electrical supply flush with the wall or floor and within the shaded area shown in the illustration on the following page. A separate circuit servicing only this appliance is required.

If a power supply cord is used, the cord must be designated for use with ranges and rated for 240 V, 30 or 50 amps (refer to the chart below), and must include 3 or 4 conductors. A 4-conductor cord is required for installations where grounding through the neutral is prohibited.

Performance may be compromised if the electrical supply is less than 240 volts.

ELECTRICAL REQUIREMENTS—SINGLE OVEN

|                    |                              |

Planning Information

The platform to support the Sealed Burner Rangetop must include a cutout for electrical and gas supply connections. Refer to the chart below for minimum base support.

When installing against a combustible surface, a minimum 5" (127) riser is required for model SRT366, and a minimum 10" (254) riser is required for 36" and 48" Sealed Burner Rangetops with a charbroiler or griddle. Follow all minimum clearances to combustible surfaces shown in the illustration on the following page. Models SRT362W and SRT484W cannot be installed against a combustible surface.

A Wolf Pro Ventilation Hood is recommended with the sealed burner rangetop. Refer to page 148 for Pro Ventilation.

A downdraft can be used with Models SRT304 and SRT366. An accessory trim kit is necessary for this installation. Contact an authorized Wolf dealer for details.

INSTALLATION REQUIREMENTS

| BASE SUPPORT | MIN             |
|--------------|-----------------|
| 30" Rangetop | 200 lb (91 kg)  |
| 36" Rangetop | 250 lb (113 kg) |
| 48" Rangetop | 300 lb (136 kg) |
| PLATFORM     | MIN             |
| Thickness    | ¾" (19)         |

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes.

Locate the electrical supply within the shaded area shown in the illustration on the following page. A separate circuit servicing only this appliance is required.

ELECTRICAL REQUIREMENTS

|                   |                              |
|-------------------|------------------------------|
| Electrical Supply | grounded, 110/120 VAC, 60 Hz |
| Service           | 15 amp dedicated circuit     |
| Receptacle        | 3-prong grounding-type       |
| Power Cord        | 6' (1.8 m)                   |

GAS SUPPLY

Installation must comply with all applicable gas codes.

If local codes permit, a certified, 3' (.9 m) long, ½" (13) or ¾" (19) ID flexible metal appliance connector is recommended.

Wolf natural gas rangetops will function up to 10,250' (3124 m) in altitude without adjustment and LP gas rangetops up to 8,600' (2621 m). If the installation exceeds these elevations, contact an authorized Wolf dealer for a high altitude conversion kit.

GAS REQUIREMENTS

Planning Information

For portable applications, Wolf grill carts are designed specifically to fit Grill Models OG30, OG36, and OG42 and the Side Burner. Model OG54 is designed for built-in applications only.

For built-in applications, Wolf Outdoor Grills and the Burner Module are designed for easy placement into a built-in enclosure. For outdoor grills, installation in a combustible enclosure requires an insulating liner. For the Burner Module, an insulating liner is not required. The enclosure should be built according to specifications for your specific installation on the following pages. If the Burner Module is installed next to an Outdoor Grill, a minimum of 12" (305) is required between the units on the rotisserie motor side and 2" (51) on the opposite side. A rotisserie side conversion kit is available from an authorized Wolf dealer.

Model BM13 does not include a tank retention system and cannot be connected to a portable LP tank.

Optional stainless steel accessory doors and drawers are available for built-in applications. Refer to pages 126–130.

Grill carts, insulating liners, and stainless steel doors and drawers are available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, [wolfappliance.com](http://wolfappliance.com).

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes.

The electrical outlet must be located within reach of the power cord. A separate circuit servicing only this appliance is required. A ground fault circuit interrupter (GFCI) is required to reduce the risk of electrical shock.

ELECTRICAL REQUIREMENTS

|                   |                              |

| Power Cord        | 6' (1.8 m)                   |

**GAS SUPPLY**

Installation must comply with all applicable gas codes.

If local codes permit, a certified, 3' (.9 m) long, 1/2" (13) or 3/4" (19) ID flexible metal appliance connector is recommended.

If the Outdoor Grill is being connected to a whole house LP supply, the LP gas pressure regulator is not provided. It can be purchased from an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, [wolfappliance.com](http://wolfappliance.com).

Planning Information

Wolf Cooktop Ventilation Hoods are recommended for use with Wolf Induction, Electric and Gas Cooktops, and Modules. For Wolf Ranges and Rangetops, a Pro Ventilation Hood is recommended.

These hoods have a telescopic chimney flue. A flue extension is available through an authorized Wolf dealer.

Installation of the cooktop hood should be 24" (610) to 36" (914) from the bottom of the hood to the countertop.

Wall and island hoods require an internal, in-line, or remote blower assembly, available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, [wolfappliance.com](http://wolfappliance.com). Refer to Ventilation Suggestions on pages 154–157. Cooktop Hoods have a vertical discharge with 6" (152) round duct.

Consult a qualified HVAC professional for specific installation and ducting applications.

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes.

For wall hoods, locate the electrical supply within the shaded area shown in the illustration below. For island hoods, locate the electrical supply on the ceiling inside the top of the hood. A separate circuit servicing only this appliance is required.

ELECTRICAL REQUIREMENTS

|                   |                              |

## Ceiling-Mounted Hood

The Ceiling-Mounted Hood is our most contemporary ventilation offering, nearly disappearing into its surroundings. It comes in two widths and is available in stainless steel or white glass. The hood ships with a remote control and can be operated using the remote control or the control panel. The control panel is recessed into the right side of the hood. The dishwasher-safe filters can be removed easily for cleaning.

| 48" Hood   | 47 1/4" (1200) | 44 1/8" (1121) |

WHITE GLASS

| DIMENSIONS | W              | A              |
|------------|----------------|----------------|
| 36" Hood   | 35 1/2" (902)  | 33 1/8" (841)  |
| 48" Hood   | 47 1/4" (1200) | 44 1/8" (1121) |

## Planning Information

Installation of the Ceiling-Mounted Hood should be 36" (914) to 84" (2134) from the bottom of the hood to the countertop.

The hood can be operated using the remote control or the control panel located on the right side of the hood.

The hood is shipped without a blower assembly. Internal, in-line, and remote blowers are available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, [wolfappliance.com](http://wolfappliance.com). Refer to Ventilation Suggestions on pages 154–157.

Ceiling-Mounted Hoods include a 6" (152) round discharge for internal blowers and a 10" (254) round discharge for in-line and remote blowers. For an internal blower, the blower box can be rotated to discharge right, left, front, or rear. For an in-line or remote blower, the discharge is vertical only.

Consult a qualified HVAC professional for specific installation and ducting applications.

## RECIRCULATING APPLICATION

The Ceiling-Mounted Hood with an internal blower only, can be installed in a recirculating application. The air discharge must be a minimum of 40" (1016) from every side of the hood. Refer to the illustration below. The ductwork and vent cover are not provided. A recirculation kit, available through an authorized Wolf dealer, is required.

Recirculating application

## Planning Information

### ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes.

Locate the electrical supply within the shaded area shown in the illustration below. Allow a minimum 12" (305) Romex® wire for connection. A separate circuit servicing only this appliance is required.

### ELECTRICAL REQUIREMENTS

|                   |                          |

## Downdraft Ventilation

### DIMENSIONS

NOTE: Shown with front mounted internal blower with 6" (152) round discharge, dashed line represents rear mount.

| WIDTH | W          | A          |
|-------|------------|------------|
| DD30  | 30" (762)  | 26½" (673) |
| DD36  | 36" (914)  | 32½" (826) |
| DD45  | 45" (1143) | 38½" (978) |

## Planning Information

Wolf Downdrafts can be installed with most Wolf cooktops, but are not compatible with the Grill, Steamer, and Fryer Modules. Downdrafts can be installed with Sealed Burner Rangetop Models SRT304 and SRT366.

For installation with a Wolf cooktop, a minimum 25½" (638) deep flat countertop is required.

For installation with a Sealed Burner Rangetop or 30" (762) or 36" (914) contemporary cooktop, an accessory trim kit is required. Contact an authorized Wolf dealer for details. For local dealer information, visit the find a showroom section of our website, [wolfappliance.com](http://wolfappliance.com).

The remote-mounted control module can be positioned horizontally or vertically. It must be located within 9' (2.7 m) of the downdraft assembly and a minimum 3" (76) from the edge of the cooktop cutout.

Consult a qualified HVAC professional for specific installation and ducting applications.

## BLOWERS

Internal, in-line, and remote blowers are available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, [wolfappliance.com](http://wolfappliance.com). Refer to Ventilation Suggestions on pages 154–157.

Internal blowers have a 6" (152) round discharge, can be front or rear mounted, and can be discharged in any direction by rotating the blower box. In-line and remote blowers have a 10" (254) discharge and can be discharged from the front or rear.

## ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes.

Locate the electrical supply as shown in the illustrations on the following pages. A separate circuit servicing only this appliance is required. A ground fault circuit interrupter (GFCI) is not recommended and may cause interruption of operation.

Certain installations may require the electrical supply be placed in an adjacent cabinet.

## ELECTRICAL REQUIREMENTS

|                   |                          |

Planning Information

Pro Ventilation Hoods and hood liners are recommended for use with all Wolf cooking appliances. Wall hoods should be at least as wide as the cooking surface and island hoods should be 3" (76) wider on each side.

For optimal performance in wall hood applications, a Pro 27" deep wall hood is recommended for use with ranges and rangetops with a charbroiler or griddle.

Installation of all Pro Hoods except the outdoor wall hood should be 30" (762) to 36" (914) from the bottom of the hood to the countertop. Installation of the outdoor wall hood should be 36" (914) to 42" (1067) from the bottom of the hood to the countertop.

Pro Hoods and hood liners are shipped without a blower assembly. Internal, in-line, and remote blowers are available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, [wolfappliance.com](http://wolfappliance.com). The blower will vary in size and is dictated by the cooking unit, volume of air, and length of the duct run. Refer to Ventilation Suggestions on pages 154–157.

Pro Hoods accommodate a 10" (254) round duct. Low-profile wall hoods allow for an adjustable discharge. All other Pro Hoods have a vertical discharge. For the 24" and 27" deep wall hoods, a horizontal discharge kit is available through an authorized Wolf dealer.

Consult a qualified HVAC professional for specific installation and ducting applications.

Optional stainless steel duct covers in a variety of heights are available for Pro wall and island hoods through an authorized Wolf dealer.

RECIRCULATING APPLICATION

Low-profile, 24" deep, and 27" deep wall hoods with an internal blower (600 CFM or less), 30" (762) and 36" (914) widths only, can be used in a non-ducted application with a recirculating filter. In this installation, kitchen air is purified through the filters and returned as clean air into the room. A recirculation kit, available through an authorized Wolf dealer, is required.

CUSTOM HOOD APPLICATIONS

Wolf Pro hood liners are for use in custom hood applications. The decorative hood can be created out of wood, plaster, tile, or metal. The shape of the hood is not critical, however, the bottom of the hood and liner must be on the same plane. The height of the liner does not need to accommodate the entire height of the decorative hood.

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes.

Locate the electrical supply as shown in the illustrations on the following page. A separate circuit servicing only this appliance is required.

For the outdoor wall hood, a ground fault circuit interrupter (GFCI) is required to reduce the risk of electrical shock.

ELECTRICAL REQUIREMENTS

|                   |                          |
|-------------------|--------------------------|
| Electrical Supply | grounded, 120 VAC, 60 Hz |
| Service           | 15 amp dedicated circuit |

## Blower Assemblies

For Wolf Ventilation Hoods and Downdrafts that do not include a blower assembly, an internal, in-line, or remote blower assembly must be selected to accommodate the cooking appliance, CFM requirements, and homeowner preferences. Internal, in-line, and remote blowers are available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, [wolfappliance.com](http://wolfappliance.com).

Ventilation suggestions on the following pages provide Wolf product CFM and blower options for each Ventilation Hood and Downdraft.

Refer to the illustrations below for dimensions of Wolf in-line and remote blowers. Installation instructions shipped with each Wolf ventilation product provide detailed specifications. These instructions can also be found on our website, [wolfappliance.com/specs](http://wolfappliance.com/specs).

## Wolf Appliance Residential Limited Warranty

### FOR RESIDENTIAL USE

#### FULL TWO YEAR WARRANTY\*

For two years from the date of original installation, this Wolf Appliance product warranty covers all parts and labor to repair or replace, under normal residential use, any part of the product that proves to be defective in materials or workmanship. All service provided by Wolf Appliance under the above warranty must be performed by Wolf Factory Certified Service, unless otherwise specified by Wolf Appliance, Inc. Service will be provided during normal business hours.

#### LIMITED FIVE YEAR WARRANTY

For five years from the date of original installation, Wolf Appliance will repair or replace the following parts that prove to be defective in materials or workmanship: gas burners (excludes appearance), electric heating elements, blower motors (ventilation hoods), electronic control boards, magnetron tubes and induction generators. If the owner uses Wolf Factory Certified Service, the service provider will repair or replace these parts with the owner paying for all other costs, including labor. If the owner uses non-certified service, the owner must contact Wolf Appliance, Inc. (using the information below) to receive repaired or replacement parts. Wolf Appliance will not reimburse the owner for parts purchased from non-certified service or other sources.

#### TERMS APPLICABLE TO EACH WARRANTY

The warranty applies only to products installed for normal residential use. The warranty applies only to products installed in any one of the fifty states of the United States, the District of Columbia or the ten provinces of Canada. This warranty does not cover any parts or labor to correct any defect caused by negligence, accident or improper use, maintenance, installation, service or repair.

THE REMEDIES DESCRIBED ABOVE FOR EACH WARRANTY ARE THE ONLY ONES THAT WOLF APPLIANCE, INC. WILL PROVIDE, EITHER UNDER THIS WARRANTY OR UNDER ANY WARRANTY ARISING BY OPERATION OF LAW. WOLF APPLIANCE, INC. WILL NOT BE RESPONSIBLE FOR ANY CONSEQUENTIAL OR INCIDENTAL DAMAGES ARISING FROM THE BREACH OF THIS WARRANTY OR ANY OTHER WARRANTY, WHETHER EXPRESS, IMPLIED OR STATUTORY.

Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other legal rights that vary from state to state.

To receive parts and/or service and the name of Wolf Factory Certified Service nearest you, contact Wolf Appliance, Inc., P.O. Box 44848, Madison, WI 53744; check the Product Support section of our website, [wolfappliance.com](http://wolfappliance.com), email us at [customerservice@subzero.com](mailto:customerservice@subzero.com) or call 800-222-7820.

\*Stainless steel (doors, panels, handles, product frames and interior surfaces) are covered by a limited 60-day parts and labor warranty for cosmetic defects.

\*Replacement filters for ventilation hood recirculating kits are not covered by the product warranty.

## Wolf Appliance Outdoor Limited Warranty\*

### FOR RESIDENTIAL USE

#### FULL ONE YEAR WARRANTY\*\*

For one year from the date of original installation, this Wolf Appliance product warranty covers all parts and labor to repair or replace, under normal residential use, any part of the product that proves to be defective in materials or workmanship. All service provided by Wolf Appliance under the above warranty must be performed by Wolf Factory Certified Service, unless otherwise specified by Wolf Appliance, Inc. Service will be provided during normal business hours.

#### LIMITED FIVE YEAR WARRANTY

For five years from the date of original installation, Wolf Appliance will repair or replace the following parts that prove to be defective in materials or workmanship: stainless steel briquette trays, gas valves, drip pans, electronic control boards and electric heating elements. If the owner uses Wolf Factory Certified Service, the service provider will repair or replace these parts with the owner paying for all other costs, including labor. If the owner uses non-certified service, the owner must contact Wolf Appliance, Inc. (using the information below) to receive repaired or replacement parts. Wolf Appliance will not reimburse the owner for parts purchased from non-certified service or other sources.

#### LIMITED LIFETIME WARRANTY

For the life of the product, Wolf Appliance will repair or replace the following parts that prove to be defective in materials or workmanship: all stainless steel components (excludes surface corrosion, scratches, discoloration, weather and atmospheric related staining and minor surface rust and oxidation). If the owner uses Wolf Factory Certified Service, the service provider will repair or replace these parts with the owner paying for all other costs, including labor. If the owner uses non-certified service, the owner must contact Wolf Appliance, Inc. (using the information below) to receive repaired or replacement parts. Wolf Appliance will not reimburse the owner for parts purchased from non-certified service or other sources.
