

# 36" Series 9 Contemporary 5 Zone Induction Self-Cleaning Range, 2 SmartZones

Series 9 | Contemporary

With large oven and cooktops that can be paired to create an expansive cook zone, this is a range made for those who love to cook.

- Five induction cooking zones, which can be joined to form SmartZones
- Convection oven with 4.9 cu.ft total capacity, nine oven functions including Roast, Aero Pastry™ with pizza mode and rapid proof for baking bread
- Non-tip full-extension shelves for safe removal of hot dishes

- High-temperature self-cleaning function breaks down food residue for an easy clean

## DIMENSIONS

Height	35 3/4 - 37 1/4 "
Width	35 7/8 "
Depth	25 1/4 "

## FEATURES & BENEFITS

### Multi-Shelf Cooking

Our AeroTech™ system circulates air evenly throughout the entire oven so dishes on the top shelf turn out just as perfect as food cooking on the bottom shelf.

### Quality and durability

Every detail has been carefully crafted. The solid, perfectly balanced soft-close door, durable cooktop and glowing halo dials all add up to an exceptional, premium range.

### Power & control

Instant and immediate control from the highest to the gentlest heat. The finely tuned cooktop controls let you sear, stir fry or simmer a delicate sauce to perfection.

### Easy To Clean

Cleaning up spills is effortless. Your cooktop simply needs a quick wipe to keep it looking good as new. The self-clean function breaks down food residue at a very high temperature, leaving a light ash that's easily removed with a damp cloth.

### Even heat

Accurate, electronically-controlled oven heat ensures a great result every time.

### Large Capacity Oven

The generous 4.9 cu.ft total capacity oven gives you plenty of space to cook multiple dishes at once, with enough room to fit a 32 lb turkey.

## SPECIFICATIONS

### Accessories (included)

2-pc grill system (Broil pan and Grill rack)	•
Broil pan	•
Full extension telescopic shelves	2 sets (part 578744)

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
