30" Series 7 5 Burner Gas Cooktop, LPG

Series 7 | Contemporary

Put on a wok, set a small pan to a simmer, or sear a steak. There's plenty of room for your cooking creativity.

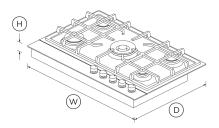

- · Five burners including a wok burner
- Auto re-ignition means if the flame goes out it will automatically re-light for safety

DIMENSIONS

Width

Height 2 5/16 "

Depth 20 7/8 "

FEATURES & BENEFITS

Precise Control

Simply turn the dials to ignite the flame quickly and safety.

Innovalve™ technology allows you to adjust the flame with

180°; gas valve rotation for super accurate temperature control.

Easy Handling

With flat cast iron grates, pots and pans can easily be slid across elements, coming in handy in busy cooking environments.

Complementary Design

The brushed stainless steel and polished metal trim has been designed for durability but also provides a modern, stylish finish, matching the Fisher & Paykel family of kitchen appliances.

Easy Cleaning

29 17/32 "

The stainless steel component is easily accessible and quick to clean. Cast iron trivets provide a durable and stable cooking platform. Their rubber feet prevent them from scratching the cooktop.

Safe And Sound

The Auto-reignite system means you don't have to hold down a dial while burners ignite – if a burner goes out it is automatically relit at the original flame setting.

Handy Accessories

This cooktop comes with a small pan support and wok stand to complement different cooking styles.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
