SAFETY AND WARNINGS

READ AND SAVE THIS GUIDE

WARNING!

To reduce the risk of fire, injury to persons or damage when using the appliance, follow the important safety guides listed below. Read all the instructions before using the appliance.

Installation

- Please make this information available to the person installing the product.
- The appliance must be installed by a qualified installer, or Fisher & Paykel trained and supported service technician to avoid faulty electrical connection.
- Ensure the installation complies with all clearance requirements and applicable standards and regulations.
- When installed in combination with a companion product, the companion product can be placed directly onto the appliance. A built-in shelf at the base of the cabinetry must be able to support the weight of both products.
- Ensure the cabinetry is square and level and with correct dimensions.
- If installing the appliance directly underneath an oven, ensure you do not damage the oven's lower trim. Fisher & Paykel does not accept any responsibility for any damage resulting from incorrect installation.
- Before installing the appliance, inspect for any signs of damage. Do not install or use damaged appliances.
- Be careful when stacking the appliances on top of each other to avoid damage to the appliances.

Electrical

- All connections for electrical power and earthing must be done by a qualified electrician and must comply with local codes and ordinances.
- Before installation, ensure that the voltage and frequency listed on the data plate corresponds with the household electrical supply.
- When combining with another appliance, ensure each appliance has its own power outlet. Avoid sharing the power point to prevent accidental switching off of the appliance.
- Ensure your appliance is properly grounded (earthed).
- Connect the drawer to a properly rated, protected and sized power supply circuit to avoid electrical overload.
- Do not use an extension cord or a portable electrical outlet device (e.g. multi-outlet outlet box) to connect the drawer to the power supply. Ensure the power supply cord is located so that it will not be stepped on, tripped over or otherwise subject to damage or stress.
- Ensure there is a switched outlet in an easily accessible area within 35 7/16" (900mm) of the centre rear of the product.

Servicing

- Do not repair or replace any part of the appliance unless specifically recommended in the user guide. All other servicing should be done by a Fisher & Paykel trained and supported service technician or qualified person.
- Always disconnect the power supply before doing any installation, maintenance or repair work.
- If the power supply cord is damaged, it must be replaced by a qualified electrician or Fisher & Paykel trained and supported service technician.

INSTALLING THE DRAWER

Check the base of the cabinetry using a leveler or ruler. Ensure the cabinetry is square and base is level.

Use the supplied spacer to locate the attachment position of the cabinet brackets to correct depth. Secure the cabinet brackets to the side panels of the cabinetry with T15 wood screws (6x).

Connect the power plug at the back of the drawer to the power outlet. Place the warming drawer carefully inside the cabinetry.

Secure the bracket cover and chassis flange to the cabinet brackets with T15 machine screws (6x).

Remove the backing of adhesive tape on the door frame. Align the custom panel carefully with the cabinetry.

INSTALLING THE DRAWER

Ensure the custom panel is correctly aligned and centered before fixing to the tape as this can only be done once.

Use shims (not supplied) to ensure gaps are accurate.

Open the drawer fully, and remove the T15 screws from both sides of the door frame.

Slide the door frame up and off the drawer.

Drill pilot holes into the custom panel through the screw holes in the door frame.

Be careful not to drill through the panel.

Secure the custom panel to the door frame with T15 wood screws (6x).

Slide the door frame back onto the drawer and align the custom panel vertically with surrounding cabinetry.

Secure the door frame in place with T15 screws.

ADJUSTING THE DEPTH

The depth of the front panel of the warming drawer can be adjusted to align with the surrounding cabinetry.

Open the drawer fully.
Using a hex key, turn the adjustment screw to move the front panel forward.
Turn clockwise to move backwards or counterclockwise to move forwards.

The depth is adjustable within 4mm.

ADJUSTING THE HEIGHT

The front panel of the warming drawer can be adjusted vertically to align with the surrounding cabinetry.

Open the drawer fully, and slightly loosen the T15 screws.

Adjust to the required height and then re-tighten the screws. The height is adjustable within 2mm.

Close the drawer and check the alignment. Adjust again if necessary.

INSTALLER CHECKLIST

IMPORTANT!

Read all installation instructions in this manual to see if the unit has been correctly installed.
