

Fresh In™ Supply Fans

Discover the Next Generation of Premium Fresh In Supply Fans

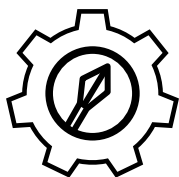

In today's tightly built homes, bringing fresh air inside makes perfect sense, whether it is done to meet code requirements or for personal comfort preferences.

The Broan® **Fresh In Premium Supply Fan** is the only ventilator that building professionals need to deliver airflow without losing efficiency – while giving homeowners the opportunity to select a comfort mode that best suits their climate zone.

INDUSTRY-LEADING AIRFLOW INTELLIGENCE

- Utilizes a 48-hour algorithm to monitor outdoor temperatures and humidity, optimizing operation in sync with the home's HVAC system.
- Set-it-and-forget-it with five user-selectable comfort modes for flexible operation based on climate zone.

EASY, VERSATILE INSTALLATION

- Easy to access unit setting controls.
- Low-profile design for ceiling, attic or wall installation, featuring a paintable door and optional trim kit for seamless integration into interior spaces.

ACHIEVE UP TO 45% ENERGY SAVINGS

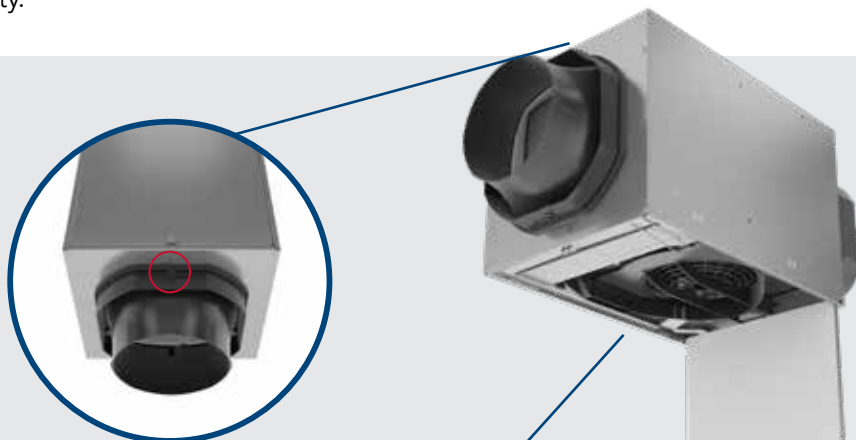

- Equipped with a powerful, reliable and energy efficient ECM motor delivering up to 180 CFM @ 0.2" w.g
- ENERGY STAR® Certified and when properly installed, meets the latest building codes.

Smarter Design Balanced With Superior Features

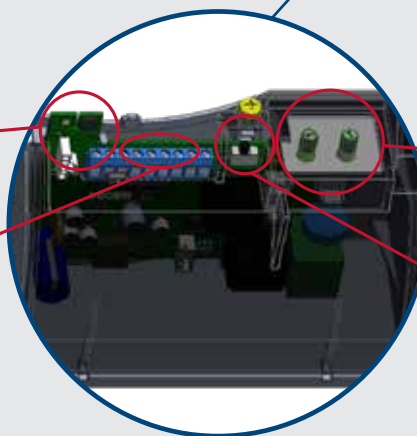

Discover the features of the Fresh In Premium Supply Fan that enhance customer satisfaction, performance, installation, and usability.

Test ports are accessible even after ductwork is installed.

LED indicator located above the cover to show unit's operating status.

Easy-to-access wiring connections for faster unit installation and set up.

Adjustment dials are large in size for ease of unit set up.

Large CFM speed adjustment switch, located above the cover, for increased visibility and precise adjustment.

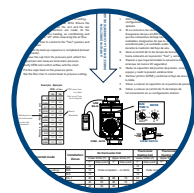

Airflow label placement on PCB cover for ease of set up and includes:

- Wiring callouts to make it easier and lessen the risk of errors in wiring that can cause unit malfunction.
- LED code callouts assist in accurate diagnosis if there is a malfunction and help with proper unit set up initially.

Equipped with a paintable access door, it blends in wherever it is installed.

A removable installation instruction label on outside of door.

Optional MERV 8 or MERV 13 rated filters remove particulates before air enters the dwelling.

From project design to final installation, the Fresh In Premium Supply Fan is the right choice to maximize efficiency while delivering profitability!
