QUALITY PRODUCTS SINCE 1947

Entertaining experts rejoice, refrigeration royalty has arrived.

Built-in refrigeration, created to elevate interiors with smart styling, thoughtful design and new inspired technology.

SILHOUETTE PRO GEN 2

FEATURES

Pro-Touch Seamless Controls

Back-lit glass panel with Capacitive Touch controls. Adjust the temperature, lighting intensity or color. Choose between standard, eco or sabbath mode.

Pro-Security

Offering the peace of mind knowing your contents are secure with a door lock, temperature alarm, and a door ajar alarm.

Pro-Hinge Zero-Clearance

Hidden hinge system allows for a flush fit integrated built-in that will blend seamlessly with your cabinets. Surrounding surfaces will be safe from marks due to the ingeniously designed door hinges. Field reversible doors available on most models.

Pro-Luminosity

Four different interior light settings and two color choices allow you to set the tone for any occasion. Choose crisp and clean Arctic White or chill Sapphire Blue. Perimetrical lighting casts a warm glow across all shelves from top to bottom. Choose the luminosity intensity - bright and bold at 100% illumination or soft and subtle at 50% illumination.

Pro-Wave Liner

The Pro-wave liner makes it possible to fit various sized bottles in the bottom of your unit.

Pro-Vection Cooling

A temperature management system with multiple sensors to adjust fan airflow to maintain a stable internal set temperature.

Coveted Cold

Dual pane, argon filled, low E glass seals in the cold to maintain an accurate set temperature and keep your drinks cold. Set and forget the temperature at a frosty 34F (1C) slightly warmer for custom crafts.

Pro-Glide Shelving System

Features 1.5" stainless steel ball bearing glides which allow for full shelf extension, and smooth, quiet convenience. The tracks are equipped with exclusive anti-vibration technology to safely cradle your finest selection of well-stored wine. Available on wine cooler models.
