

Installation Instructions for Beer Tower Base (KITFLTW)

Attach your beer tower (not included) to the floating tower base by following the instructions below. A 2" - 2 ¼" space is necessary between the top of the kegerator and the counter to ensure the tubes function correctly.

Note: If the tower's holes do not line up with the pre-drilled holes on the base, you will need to drill new holes.

Attaching the Tower to the Base

1. Unscrew the top cover of the base.
2. Attach your tower onto the top cover.
3. Take off the top insulation and insert the tubes through the opening.
4. Place the tubes into the track of the bottom insulation.
5. Reinsert the top insulation into the base.
6. Secure the top cover back in place.
7. Screw the front base cover to the opening of the base.

Mounting the Base to the Counter

1. Determine where the tower will be mounted on the counter space.
2. Ensure the counter area is clean and dry.
3. Place the unit on its back to remove the protective film from under the base.
4. Lift the tower at the base, being careful not to touch the adhesive to the counter.
5. Tilt the tower towards you and align the base's opening with the counter's edge.
6. Drop the tower into place and apply an even amount of pressure to the base.

If you have checked the information above and you still need help with your appliance, call our Customer Service facility at **800-932-4267 (Ext. 513)** between 9:00 AM and 5:00 PM ET or visit our website **summitappliance.com/support** at any time. We will do our best to answer your questions.
