

Features

Here are a few of the special features we offer in our entertainment items:

- **Touch Lighting** - to create a soft ambiance or to highlight display items, many hutches include lighting controlled by a three-intensity touch switch.

- **Movable Back Panel** - some hutches & wall units feature a moveable back panel. It allows the use of deeper televisions like DLP. When using flat panel televisions, the movable back panel can be moved forward to increase the viewing angle. TV or mounting brackets can be mounted directly to these sturdy back panels. Movable Back Panels also feature grommets for wiring as well as ventilation holes to enhance air circulation and reduce heat build-up.

- **Ventilation** - audio compartments feature back ventilation holes to enhance air circulation and reduce heat build-up during use.

- **Drawer Dividers** - many drawers have removable dividers that can be spaced to take DVD's or CD's.

- **Drop-front Drawers** - drop-front drawers provide space for additional components or for use with video game controllers. Some provide connections for gaming consoles.

- **Wood/Speaker Cloth/Glass Options** - many consoles include a combination of interchangeable wood, glass or speaker cloth panels to provide options for the look and use of the furniture.

- **Electrical Outlets** - multiple UL listed electrical outlets make equipment hookups easy.
