

# 12 Important Reasons You'll be more comfortable owning quality upholstered furniture by Mayo

**2** Generous use of back springs insure support and durability - each spring connected side-to-side in two places by spring steel wire.

**3** Backs designed for durability and comfort. Most backs feature an inner bag with two chambers so the fiber can't settle.

**5** Comfortable, durable arm tops, feature "half round" shaped, high density polyurethane tops that will keep arms looking sharp.

**7** Stripes and plaids always matched.

**1** The best frames in the business. All hardwood parts are precision cut utilizing CNC routing technology. Frames also feature mortise/tenon joints that interlock for extra strength. Mayo frames feature a limited lifetime warranty.

**4** Mayo "perma-plates" used in critical edge-to-edge applications - will never come loose or squeak.

**6** All Mayo frames are padded for long lasting comfort and good looks.

**SmartFRAME  
TECHNOLOGY**

**8** High quality, 2.3 lb. high density, high resiliency seat cushion foam, featuring a limited, lifetime warranty.

**9** Every Mayo seat cushion is wrapped in high quality polyester fiber for a plump well-tailored appearance.

**10** Fully lined skirts for a clean, well tailored appearance.

**11** Heavy duty, removable legs - a real plus for moving product into a tight location.

**12** Some models feature a coil spring seating system with 12 "locked-in" - heavy gauge coils under each single seat cushion. This coil spring system utilizes the most modern manufacturing methods for long lasting comfort and trouble free use. Other models feature Mayo's high quality sinuous seat spring construction method.

The highest quality components are always used in Mayo products. Compare the major elements of construction - frame, seat cushions, spring suspension systems, padding components ... we're confident you won't find a better value.
