

SITTING IS  
BELIEVING

“

My first words were wow! I was able to tilt back and get my legs up and get my back into a proper position. I felt relaxed immediately. It adapts to your body unlike anything else on the market.

*-Bob S. / Schoenfeld Interiors*

It's not really a recliner. It's not really an accent or lounging chair or anything like that. It has its own way of moving and kind of adapting to the way that you want to sit comfortably.

*-Cameron K. / Klaban's Home Furnishings*

Our Comfort Air is comfortable and stylish. The style fits perfectly in our modern home. I can spend hours in it - no pressure on my back or neck. It reclines to the perfect angle. We love it!

*-Shan H. / Austin, Texas*
