

Tommy Bahama®

OUTDOOR LIVING

THE FINEST MATERIALS

All-Weather Wicker

Tommy Bahama all-weather wicker is crafted from the finest man-made materials and custom designed in exclusive colors, shapes, sizes and patterns to our exacting standards. It is entirely woven by hand, capturing the timeless and classic look of natural wicker or rattan, with exceptional durability. The material is made of high-density polyethylene, a recyclable material with great tensile strength. It is highly resistant to UV exposure, mildew, fading, staining, stretching and cracking. Tommy Bahama all-weather wicker is easy to maintain by cleaning with a mild solution of soap and water.

Aluminum Frames

Tommy Bahama Outdoor Living frames are engineered for strength and built to last using endurance aluminum. Joints are precision-welded for strength and durability and then ground and polished by hand to ensure a smooth and seamless look. Aluminum frames on the Kingstown Sedona collection are cast from special hand-carved molds, allowing for exceptional depth and detail in the design. Larger components are bolted together for greater strength.

OUTDOOR LIVING

THE FINEST MATERIALS

Finishes

Finishes on Tommy Bahama Outdoor Living products are specially formulated, with custom base coats and painstaking handwork, to achieve a look unique in the industry. Ultra-durable polyester resin powder-coated finishes are baked on aluminum frames, ensuring that they are colorfast and highly resistant to damaging UV rays. Finishes are also corrosion and scratch resistant. The element that sets these designs apart is meticulous handwork using techniques like dry brushing, padding and burnishing that result in a product that is virtually indistinguishable from fine interior home furnishings, yet built to endure the elements. This is a hallmark of Tommy Bahama style.

Weatherstone™ Tops

The Weatherstone™ top is a man-made product that showcases the best attributes of natural stone, while offering exceptional durability. Tops are UV resistant, stain resistant and protected with a polyurethane sealant that significantly reduces the need for cleaning and maintenance. They are manufactured using a unique composite of fiberglass and concrete, making them extremely strong. All Tommy Bahama Weatherstone™ tops feature exclusive designs, textures and colors. Each top is finished by hand, with artisans recreating the natural character of stone on each top. Because they are hand-finished, no two are exactly alike.

OUTDOOR LIVING

THE FINEST MATERIALS

Natural Stone Tops

The natural beauty of travertine and marble is unsurpassed in creating custom tabletop designs. Intricate patterns used in Tommy Bahama Outdoor Living incorporate three distinctive materials: Ivory Travertine from Spain, Suede Travertine from Central America, and Café Emperador Marble from Spain. The blending of geometric patterns and colors creates a magnificent design statement.

Travertine is a form of limestone, known for its unique range of color and veining. The Romans mined travertine for building temples, aqueducts and monuments. The Colosseum in Rome is the largest building in the world constructed of Travertine. Michelangelo chose travertine for the dome of St. Peter's Basilica. It is a material that has gracefully endured the test of time.

The central field of the Tommy Bahama tabletop is crafted from Ivory Travertine in a classic parquet pattern. Suede Travertine is used around the soft rounded edge of the top, and mixed with the dark Café Emperador Marble in a geometric pattern which forms an elegant decorative border.
